IT Business Processes	<ul style="list-style-type: none"> • Experience in leading and managing IT business process change • Experience in monitoring and measuring effectiveness of operating IT business processes • Strong knowledge in IT business process modelling • Understanding of tools e.g., ERP, BPM, CRM and BI and protocols e.g., SOAP, WSDL, XML is also desirable 	<ul style="list-style-type: none"> • Responsible for leading and driving business process analysis and change across the entire project lifecycle • Responsible for communicating with and engaging multiple stakeholders across different functions, teams, and countries 	<ul style="list-style-type: none"> • Singapore
Data Analytics/ Scientist	<ul style="list-style-type: none"> • Possess strong business acumen, as well as an ability to communicate findings and mine vast amounts of data for useful insights • Practical experience with SAS, ETL, Hadoop, Tableau, data processing, database programming and data analytics • Strong knowledge of data and analytics architecture to ensure analytics objectives are aligned to business 	<ul style="list-style-type: none"> • Review the current target operating model by reviewing current data on hand, define and design a future state by proposing new KPIs • Optimize joint development efforts through appropriate database use and project design • Apply quantitative techniques in solving business problems 	<ul style="list-style-type: none"> • Singapore
Network & Infrastructure	<ul style="list-style-type: none"> • Hands on network deployment of complex data networks – e.g., Cisco Routers, Switches and WIFI along with Arista switch / router experience • Strong knowledge of L2 & L3 packet & frame protocols • Strong knowledge of industry standard routing protocols and datacenter technologies such as server farms, switch fabrics, DWDM, Geo Server Farms (Stretch clusters), Fiber Channel, Bladecenterscation Requirements • Thorough understanding of TCP / UDP / IP addressing, behavior and the OSI model / stack 	<ul style="list-style-type: none"> • Responsible for all technical network delivery and configuration functions for all network related devices. This includes the initial build-out, migration activity and decommissioning • Actively deploying network devices and experience on major projects and migrations 	<ul style="list-style-type: none"> • Singapore

#13 R Systems (Singapore) Pte Ltd

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
Security Administrator	<ul style="list-style-type: none"> AWS Sys Ops Certified 4 years or more relevant working experience in information security technologies (IPS, DLP, APT, WAF, SIEM) 	<ul style="list-style-type: none"> Administer security infrastructure which includes IPS, DLP, APT, WAF, SIEM and technologies handling day to day operations for effective threats mitigation Work cooperatively with various IT infrastructure team, applications and business units for the effective operations of the security infrastructure 	<ul style="list-style-type: none"> Islandwide
Test Analyst	<ul style="list-style-type: none"> Fresher with some experience in Software manual testing 	<ul style="list-style-type: none"> Produce Test Scenarios targeting all business requirements Produce detailed Test cases and Test Procedure Perform test activities such as test execution, capturing and analyzing test results and raising & tracking defects 	<ul style="list-style-type: none"> Islandwide
Automation Test Analyst	<ul style="list-style-type: none"> Experience with Tricentis Tosca test automation tools Experience with JIRA 	<ul style="list-style-type: none"> Conduct feasibility/POC for new projects/solutions to determine appropriate approach for test automation Planning and delivery of test automation strategy across different technologies & platforms 	<ul style="list-style-type: none"> Islandwide
Java Developer	<ul style="list-style-type: none"> Java development with skills in Java, J2ee, Spring, Hibernate, Restful API, Json, Java script Good understanding of J2EE architecture, Java Design Patterns and Object Oriented Programming 	<ul style="list-style-type: none"> Involve in system, sub-system, interface and database design Responsible for coding and unit testing of functional modules of the system 	<ul style="list-style-type: none"> Islandwide
.NET Developer	<ul style="list-style-type: none"> Visual Studio 2017 (VB.NET, C#.NET) MS SQL Server 2012 (SQL Queries) XML, SOAPUI (web services) Javascript 	<ul style="list-style-type: none"> Develops software solutions by studying information needs; conferring with users; studying systems flow, data usage, and work processes; investigating problem areas; following the software development lifecycle. 	<ul style="list-style-type: none"> Islandwide
Data Analyst	<ul style="list-style-type: none"> Skills in SQL scripts and Excel and reports. 	<ul style="list-style-type: none"> Sales analysis by data mining and data analysis 	<ul style="list-style-type: none"> Islandwide

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
		<ul style="list-style-type: none"> Data discovery by specializing in data extraction, making sense of data and dashboarding. 	
Full Stack Developer	<ul style="list-style-type: none"> J2EE web, JavaScript, HTML, CSS, Maven, Ant, Spring, SVN, Git, Bit-Bucket, Eclipse, MS-SQL, My-SQL, Oracle, SSL, POSTMAN, SOUP-UI, RESTFul Service development, JQUERY, AJAX, Fetch API, Web-Sockets, HTTP2.0 etc. Experience working in Linux, AIX and Windows environments. 	<ul style="list-style-type: none"> Full stack development and support. Support and maintain the running of e-business applications. 	<ul style="list-style-type: none"> Islandwide
IT Helpdesk Support	<ul style="list-style-type: none"> Helpdesk Support, Desktop support 		
Network Engineer	<ul style="list-style-type: none"> CCNP, CCNA Certified 		
Cloud Consultant	<ul style="list-style-type: none"> Knowledge on AWS cloud, openshift, docker, EC2 		
Business Analyst	<ul style="list-style-type: none"> Insurance or Banking functional knowledge 	<ul style="list-style-type: none"> Support in day to day UAT, writing of test script, consolidating user requirement specs documents. 	

#14 ST Engineering Electronics

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
Senior Software Engineer (ICS)	<ul style="list-style-type: none"> Degree in Computer Science, Computer Engineering or related disciplines Experience in software architecture, database design and implementation, system and database administration Familiar with .NET, Java, SQL, C/C++, Hibernate Framework Experience in system integration, networking, IT Security, Software Testing, software quality assurance tools such as Subversion, SOAPUI, SonarQube, Parasoft, Mantis/ JIRA will be an added advantage 	<ul style="list-style-type: none"> Responsible for requirement gathering and define requirement specifications Lead project team members to deliver project on time. To be the overall technical lead for project implementation Ensure software code quality. Liaise with other team within project for successful project delivery Document software project plan, design plan, configuration management according to CMMI quality standards 	<ul style="list-style-type: none"> 8.30am to 6pm/ Jurong East
Senior Network Engineer (ICS)	<ul style="list-style-type: none"> Bachelor's degree in Engineering, Computer Science or Information Technology Field / Diploma in Information Technology 	<ul style="list-style-type: none"> Experience in installation, testing, implementing and commission IT infrastructure and ensure reliability and efficiency. Undertake projects on 	<ul style="list-style-type: none"> 8.30am to 6pm/ Jurong East

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<ul style="list-style-type: none"> • More than 5-year experience in Network industry with minimum 3 years experiences in post-sales support • Familiarity and strong skills on Cisco products (Switches, Router, IPS/IDS, ISE, ASA, ACS, Prime, UC), Alcatel-Lucent, F5 and Solarwinds • Security Firewall (Fortinet, Juniper, Checkpoint) and project management skill set is a plus • CCNA or CCNP certification highly preferred 	<p>new or existing network implementation and enhancement</p> <ul style="list-style-type: none"> • Work closely with pre-sales to plan for post-sale activities on proposed solutions and consultancy services. Understand and can articulate the pain points experienced by customers • Conduct fault analysis and verification test on recovered malfunction equipment or accessories from fault calls. System support to escalate issue to principal TECH for problem resolution • Able to perform the role of project lead in network implementation and integration. Well versed with the advanced engineering and administration of multiprotocol routers, multilayer switches and network security devices 	
<p>Software Engineer (ICS)</p>	<ul style="list-style-type: none"> • Degree in Computer Science, IT, Engineering or equivalent with minimum 3~5 years of working experience in software development. Complete at least 1 full SDLC cycle in a sizable software system development project • Solid background in OOP and knowledge of software design patterns/ best practices and software development process is essential. Specialized in developing scalable enterprise and web based applications using Java/J2EE, Spring/Hibernate framework • Strong Hands-on experience with Frameworks like NodeJS, HTML5, CSS3, JQuery, Bootstrap, AngularJS. Hands-on experience/knowledge on Data modelling, Database/XML interaction & No-SQL technologies like MongoDB, Cassandra • Experience in Micro Service Architecture implementation and web servers & application 	<ul style="list-style-type: none"> • To participate in developing high availability, scalable smart nation / Internet of Things (IoT) platform products • To perform efficient, maintainable, reliable software design, coding, unit testing and integration • To deliver software products with a high level of quality and customer satisfaction • To evaluate / apply state-of-the-art technologies, tools, programming techniques, and computing equipment 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Jurong East

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	servers such as Apache, Nginx & Tomcat		
Network and System Engineer (ICS)	<ul style="list-style-type: none"> • Bachelor / Master in Information Technology/Computer Science/Computer Engineering or equivalent with at least 3 years relevant working experience. Willingness to work overseas will be an added advantage • Hands-on experiences in setup, configure and troubleshoot Microsoft Windows Servers and Linux machines • Experience in design, setup, deployment, troubleshooting, system administration, maintenance and support firewalls and network devices • Knowledge and practical experience in Information Technology (IT) Security Policies and OS hardening are added advantage 	<ul style="list-style-type: none"> • Liaise and work with solution providers for the setup and troubleshooting of the IT systems hardware, in Data Centre environment • Implement, test and troubleshoot servers, security and network equipment in IT system • Planning and execution of system administration, installation, deployment, testing and commissioning • Generate documentation, test plans, procedures for site and system installation/design 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Jurong East
Software Engineer (ICS)	<ul style="list-style-type: none"> • Diploma / Degree in Computer Science, IT, Engineering or equivalent with 3~5 years of working experience in software development • Complete at least 1 full software development life cycle in a sizable software system development project • Good experience in Java, web services, OOP and software design patterns • Data modeling and database design experience 	<ul style="list-style-type: none"> • Perform requirements analysis, system design, development, testing for Enterprise Applications • Analyze & solve performance and security related requirements in the applications • Produce documentation and artifacts for the product/ project • Provide technical support during maintenance phase of the system and pre-sales support in preparing solution proposals and product demonstrations 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Jurong East
Software Engineer (T&S)	<ul style="list-style-type: none"> • Diploma / Degree in Computer Science / Computer Engineering / Electronics & Electrical Engineering or related fields. • Hands-on experience in system design & developing applications for medium to 	<ul style="list-style-type: none"> • Perform design & implementation of software system projects that define the architecture, components, interface & other characteristics of an application. • Conduct user requirement, application development, system integration, deployment as well as troubleshooting. 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<p>large-scale projects would be an advantage.</p> <ul style="list-style-type: none"> • Knowledge / experience in C++, C#, Java, object-oriented programming is essential. • Training will be provided for those without work experience. 	<ul style="list-style-type: none"> • Conduct testing to evaluate the attribute or capability of the software & determine that it meets the expected results. • Perform quality assurance & ensure the software meets customers' expectations. Assist in adhoc projects when required. 	
Data / Software Development Engineer (T&S)	<ul style="list-style-type: none"> • Bachelor's degree in Engineering/Computer Science, similar technical field of study or equivalent practical experience. • Knowledge in C# .NET/ C++ and Web technologies preferred. • Strong knowledge in distributed architecture, database design and data analysis is an advantage. • Positive attitude and willing to learn • Team player and has a passion for building attractive and usable software 	<ul style="list-style-type: none"> • To work with the development team to build and design solutions to facilitate analysis of data from simulation and instrumentation systems. • To focus on the design, implementation and testing of modules in the area of data mining, curation and provisioning. • An opportunity to contribute and be involved in all aspects of the product development life cycle. 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
Unity Developer (T&S)	<ul style="list-style-type: none"> • Bachelor degree in Computer Science or equivalent • At least 2 years' experience in Unity3D development. • Proficient in Unity C# • Networking domain knowledge (esp. using Unity Photon networking) will be an advantage • Knowledge on integrating animations into Unity will be an advantage • 3D modelling experience will be an advantage 	<p>The job will require Game Development in Unity, with the scope encompassing of at least the following: -</p> <ul style="list-style-type: none"> • First Person View, Multiplayer Gameplay • User Interface 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
Senior / Hardware Engineer (T&S)	<ul style="list-style-type: none"> • Bachelor Degree in Electrical & Electronics Engineering or relevant fields. • At least 2 years of relevant industry work experience in leading hardware and product development from concept to delivery • Full development life cycle experience including board layout, testing, and implementation • Knowledgeable in Environmental and EMI/EMC qualification 	<ul style="list-style-type: none"> • System architecture definition & design based on customer requirements • Provide technical leadership on circuit design from concept to production • Conduct circuit measurements using laboratory spectrum analyzers, oscilloscopes, network analyzers, etc. • Conduct testing and evaluation for designs, prototypes and products • Manage hardware design house through prototyping, pilot run and product development 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<p>requirements, standards and process</p> <ul style="list-style-type: none"> • Proficient in advance electronic circuit design / simulation and analysis, PCB design tools such as Altium • Experience in development on Zigbee transceiver & optics engineering would be advantageous. 	<ul style="list-style-type: none"> • Lead in hardware and environment qualification and testing such as EQT, EMI/EMC. 	
<p>System Engineer (ISS)</p>	<ul style="list-style-type: none"> • Degree in Computer science / IT / Engineering or equivalent • Possesses a valid CCNP/CCDP certification or equivalent • Minimum 5 years of work experience in related field is required for this position • Extensive knowledge in VLAN, VPN, MPLS, BGP, OSPF • Experience in network design, setup, maintenance and troubleshooting • Working knowledge of DNS, DHCP, NTP configuration, TCP/IP networking • Ability to configure and manage Cisco router and switch • Ability to configure and manage load balancer like F5 LTM, GTM • Perform root cause analysis • Good knowledge in LAN/WAN • Good communication (both verbal and written) skills and • Excellent customer service and support skills 	<ul style="list-style-type: none"> • Maintenance, troubleshoot and resolve any system/network related problems • Conduct root cause analysis & implement pro-active measures • Manage network changes through established change request process • Provide networks related technical advice to customers or project team • Develop and maintain documentation of installation & configuration procedures • Generate relevant administrative records and reports. • Escalate unsolvable system problems and service request to the OEM/Vendor for technical support and reporting the escalation to the Group Lead • Coordinate system development tasks to include design, integration and formal testing on the Change Request • Oversee all transitions into production on the Change Request • Develop and complete actions in system specifications, technical and logistical requirements and other disciplines on the Change Request • Create and maintain programmatic and technical documentation to insure efficient planning and execution on the Change Request • Manage and document system configurations on the Change Request • Provide level 2/3 supports • Perform standby duties if required • Other duties as required 	<ul style="list-style-type: none"> • 8am to 5.30pm/ Ang Mo Kio
<p>Engineer (IBM Websphere Administrator) (ISS)</p>	<ul style="list-style-type: none"> • Minimum Diploma/Degree holders in Computer Science, Electrical/Electronic Engineering, Information 	<p>You'll be responsible for managing and administering critical IBM middleware infrastructure that supports key business functionalities. The candidate should have knowledge and/or experience of at least two or more tasks on the below: -</p>	<ul style="list-style-type: none"> • 8am to 5.30pm / East side

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<p>Technology or another related field</p> <ul style="list-style-type: none"> • Primary Skill: IBM WebSphere/ Java Technology • Interpersonal and teamwork, deals effectively with a wide variety of people. Most importantly to have a positive work attitude and keen to work and learn quickly the task assignment to understand and be familiar in a typical work day. 	<ul style="list-style-type: none"> • Installing and Administrating WebSphere Application Server (WAS) and IBM HTTP server on Windows and various platforms • Installing and configuring LDAP • Knowledge of key concepts such as Cell, Node, Profile, JVM, JRE, Standalone Server, WASND, Clustering/Clone, High Availability, Scalability and Workload management • Java J2EE Development Experience and Understand user requirements and able to translate into Java application • Experience in using WebSphere for deployment of java application for production use • Knowledge or some experience in Java Frameworks such as SPRING and Hibernate, SVN / Eclipse / Tomcat for development environment • Knowledge of IBM Business Process Management (BPM), Websphere portal and FileNet • Well versed in SQL queries for development • Note: On Job Training (OJT) will be provided for some of the above tasks especially IBM Middleware portion. 	
<p>Engineer (AIX System) (ISS)</p>	<ul style="list-style-type: none"> • Degree in Computer science / Information Technology / Engineering or related disciplines • Minimum 2 years of work experience in related field is required for this position • Strong technical skills in AIX & Linux • Knowledge in Microsoft Windows Servers/VMware is a plus • Candidate with more than 5 years will be considered as Senior Position • Good communication (both verbal and written) skills • Excellent customer service and support skills 	<ul style="list-style-type: none"> • Install and configure AIX operating systems and servers. • Support AIX OS to run various software applications. • Maintain and upgrade the AIX OS. • Install and test AIX OS patches. • Develop procedures for AIX security and management. • Update standard policies according to environment changes and audit results. • Develop performance improvement initiatives for AIX system environment. • Identify and resolve system issues in a timely manner. • Plan and coordinate the installation, testing, and maintenance of AIX systems software and related hardware. • Plan and execute AIX projects within approved timelines. • Analyze software and hardware environments to determine any system defects. 	<ul style="list-style-type: none"> • 8am to 5.30pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
		<ul style="list-style-type: none"> • Maintain documentation of AIX hardware and software components and user and operator procedures. • Develop data backups and retrieval techniques in case of failure, redundancy, etc. • Detect and troubleshoot system operational and functional issues. • Perform performance maintenance routines to ensure continuous system availability. • Willing to perform standby duties 	
<p>Software Engineer (SEC) (SatComs)</p>	<ul style="list-style-type: none"> • Degree in Computer Science or Engineering with at least 2 years of software experience • Proficient in programming in C/C++ • Ability to perform systematic and detailed analysis • Experience in developing and delivering fully functioning software • Familiarity with the following would be advantageous: <ul style="list-style-type: none"> ○ Linux development environment ○ Automated unit-test (e.g. GoogleTest) ○ Version control (e.g. SVN) ○ Scripting (e.g. shell scripts, Python) • Able to work in a team • Self-motivated and able to work under minimum supervision • Good communication skills - writing, oral 	<ul style="list-style-type: none"> • Participate in software development life cycle from requirements analysis to software release • Design and develop efficient software for the intended product or solution • Create good code documentation and robust test cases for software developed • Collaborate with teammates to contribute to overall solutioning 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
<p>Firmware Engineer (SBG) (SatComs)</p>	<ul style="list-style-type: none"> • Degree in Electrics, Electronic, Computer Engineering or equivalent • Proficient in C/C# and DSP programming • Hands on experience in MCU and Linux programming • Familiar with IoT protocols (MQTT, CoAP, etc.) • Exposure in electronics hardware, test and measurement • Strong communication and technical writing skills 	<ul style="list-style-type: none"> • Develop product for sensor / detector / IoT systems • Design and develop sensing / detector algorithm and application firmware for embedded system • Work closely with hardware and system engineers for product & system level design, verification and validation • Support applications and field activities 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
<p>Senior Software Engineer (Embedded) (SatComs)</p>	<ul style="list-style-type: none"> • MS/BS in Computer Science/Computer Engineering/Electrical Engineering • Strong C++ programming experience in a POSIX environment • Experience programming software on an embedded Linux platform • Working knowledge of GNU development and debugging tools • Knowledge of Linux kernel and Linux device drivers • Knowledge of TCP/IP, Sockets Programming • Some experience with Shell scripting is desirable • An understanding of FPGA development is a plus • Knowledge of Satellite communication is a plus • Experience with other Realtime embedded environments is a plus • Knowledge of Agile Scrum is a plus • A team player with positive attitude 	<ul style="list-style-type: none"> • Design, develop and test embedded software (more on application layer) • Participate in design and code reviews • Support iDirect's Technical Assistance Center and external customers when needed • Other duties as assigned 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
<p>Network Security Engineer (SPTel)</p>	<ul style="list-style-type: none"> • (Checkpoint, Juniper, Cisco, Fortinet, etc.). Certificate for any of the platform is a plus. • Have good knowledge of networking – switching, dynamic routing protocols, static and rule based routing, etc. Certificate in any networking area is a plus. • Have good knowledge of encryption and tunneling protocols (IPSec, SSL VPN, TLS, IKE, IKEv2, etc.) • Understand application protocols in context of OSI network layers and content inspection (Load-balancing, WAF, IPS, IDS, etc.) • Good verbal communication skills (English) in both technical and non-technical communications. 	<ul style="list-style-type: none"> • Due-diligence of existing client’s solution, analyzing physical topology, logical interconnectivity, service dependency, application flows and security constraints. • Creating designs and support documentation for the delivered infrastructure. Raising change records and executing activity while adhering to client’s processes and procedures. • Support and trouble-shooting of network security devices and systems delivered by the project to the client during transition/handover period. That includes firewalls, intrusion detection systems, virtual private networks (VPN), security device management platforms, etc • Vulnerability management, platform selection, software production-feature set and load- testing for chosen platform 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<ul style="list-style-type: none"> • Experience in creating design documents (HLD, LLD) diagrams, and presentations (PPT) • Analytical mindset for problem solving under stress and time pressure. • Degree in Computer Science/IT preferred 		
IOT Planner (SPTel)	<ul style="list-style-type: none"> • Experience with Docker, Kubernetes, Kafka, S.O.L.I.D., Agile/SCRUM development environment • Experience with MQTT, Modbus serial and TCP/IP, EtherNet/IP, PROFINET communications • Experience with LoRAWAN, WiFi and/or DSRC planning and deployment • Ability to read and interpret design documentation as well as customer specifications • Knowledge of CyberSecurity in IoT space • At least 3 years relevant experience • Certified IP competence • Diploma/Degree in Computer Science, IT, Information System or Electronics Engineering 	<ul style="list-style-type: none"> • Identifying, proposing, deploying, and supporting client IoT strategies and solutions. • Providing ongoing support for the commercial launch of IoT solutions. • Serving as a subject matter expert, teaching and training internal teams. • Providing guidance on RFI/RFP/RFQ responses. • Managing solution lifecycle and field support, from pilot to commercial adoption. 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
NFVI Engineer (SPTel)	<ul style="list-style-type: none"> • Knowledge of NFV/ infrastructure technologies (compute, storage, networking, physical infrastructure, software, commercial off the shelf (COTS) and open source packages and solutions, virtual and cloud including IaaS, PaaS and SaaS); infrastructure management tools and monitoring tools; solution sizing for hardware/software platforms; industry standard security requirements and designs. • Troubleshooting; installing and repairing PC hardware and software; advanced design, maintenance and 	<ul style="list-style-type: none"> ▪ Responsible for the design, deployment, installation, provisioning, troubleshooting, and reporting for the VMware & Hyper V infrastructure and related Cloud services ▪ Integration of SOAP/REST application Interface ▪ Develop/test Open Virtualization Tool Integration ▪ Develop and implement maintenance plans and activities for Cloud infrastructure including: application of fixes, security patches and upgrades, capacity increases and other Cloud related maintenance ▪ Provide technical and engineering support to both internal groups and customers ▪ Assist cross functional teams in troubleshooting and problem identification 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio

Job Positions	Pre-requisites	Key Responsibilities	Working Hours/Location
	<p>repair of servers; applying creative solutions to business problems to ensure business needs are most effectively met; advanced information system configuration management.</p> <ul style="list-style-type: none"> • Understanding of cloud, Hybrid configuration, diversity across platforms. • Network understanding, can write fire wall rules, source destination, port, understanding a 3 tier network. • Degree in IT, Computer Science or relevant field preferred. 	<ul style="list-style-type: none"> ▪ Support project quality assurance activities; and adhere to proper escalation and change control procedures. 	
<p>Network Engineer (SPTel)</p>	<ul style="list-style-type: none"> • Bachelor’s degree in Computer Science or related discipline • Hands-on experience in designing, implementing and/or operating a telecom service provider fixed network. • Experience in applying SDN, NFV and other more recent network related technologies • Good analytical, problem-solving and communication skills. 	<ul style="list-style-type: none"> ▪ Network Planning / Implementation: <ul style="list-style-type: none"> - Development and enhancement of network design; planning and execution milestones; network costing planned according to budget - Network planning to include both transmission and IP layers - Network should be diverse, secure, resilient and scalable - Network should also leverage the latest technologies (such as SDN/NFV) where possible to differentiate from existing networks - Customer-oriented: Quality and timely rollout of infrastructure according to business plan - Network should meet specified SLAs in terms of performance, availability, etc • Internet and International Network Connectivity <ul style="list-style-type: none"> - Work with local, regional and global carriers to ensure that SPTel network has the necessary Internet and International connectivity reach • Use of Digital Systems <ul style="list-style-type: none"> - Use of systems to enhance the network service architecture, hence leading to better customer experience. These systems may include OSS, GIS, telemetry, analytics, etc 	<ul style="list-style-type: none"> • 8.30am to 6pm/ Ang Mo Kio
