

Job Opportunity Briefing: PSA Careers (4 Aug 2026)

As part of our effort to save the environment, please return this booklet at the exit after you have completed all interviews.

JOB LISTING BOOKLET

About e2i (Employment and Employability Institute)

e2i is the empowering network for workers and employers seeking employment and employability solutions. e2i serves as a bridge between workers and employers, connecting with workers to offer job security through job-matching, career guidance and skills upgrading services, and partnering employers to address their manpower needs through recruitment, training and job redesign solutions. e2i is a tripartite initiative of the National Trades Union Congress set up to support nation-wide manpower and skills upgrading initiatives. For more information, please visit <https://e2i.com.sg/>.

PSA CORPORATION LTD

PSA Singapore is one of the flagship terminals of [PSA International](#), a leading port group with a global network encompassing 179 locations in 45 countries. In Singapore, PSA operates the world's largest transshipment hub with unrivalled connectivity, facilitating container movements across the world, 24/7 all year round. Behind our mega port is a team of professional employees who lead the industry with service excellence, passion and innovation.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Operations Executive	- Local polytechnic diploma or GCE A levels with 2 H1 and 2 H2 credits. - Willing to perform shift duties.	Master the fundamentals of vessel operations and resource planning. Oversee port operations within and throughout PSA Terminals.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Assistant Operations Executive (LCL Import Planning)	- Diploma in any discipline - Experience in logistics operations management in 3rd party logistics, trucking, distribution or manufacturing environment will be an added advantage - Proficient in MS Office programs	- To support the day-to-day supply chain or logistics activities of our customers which can cover import container coordination and warehouse planning of console containers. - He/She is required to coordinate with customers, contractors, truckers and transporters to support the execution of these activities. He/She is also required to handle staff administrative matters together with a team of supervisors and admin support staff.	5 days - Monday to Thursday 8.30 am to 6.00 pm - Friday 8.30 am to 5.30 pm
Container Handling Specialist (Prime Mover Driver)	Work on rotating shift	Drive specialised vehicles to truck containers within and between PSA terminals efficiently.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Container Equipment Specialist (Yard Crane)	- Able to work at heights - Work on rotating shift	Operate 7-storey high cranes in the container yards, loading and unloading containers onto and from container trucks. Your accuracy and efficiency is crucial to smooth operations and contribute towards the port's performance.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Dormitory Supervisor	- Minimum Secondary qualification - Work on rotating shift	- Assisting the Dormitory Manager in Dormitory Operations: - Ensure that dormitory premises are cleaned and meals are provided on time	Shift work

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• Schedule and supervise cleanup and repair assignments as and when necessary • Provide daily update of residents • Oversee the proper usage of the recreational facilities and facilitate the booking of these facilities • Ensure that rooms are equipped for arrival of workers • Collaborate with security staff to conduct checks • Attend to residents' queries and requests etc	
Electrical Engineer (Digital Systems)	• Degree in Electrical or Electronics Engineering • Experience in automated reefer monitoring systems and embedded systems will be an added advantage	• Lead a team of technical staff in the development, operation and maintenance of digital systems and communications services to ensure the delivery of quality solutions and reliable support for terminal operations. These include systems for Security, Surveillance, Gate, Wireless Voice Comms and IoT. You will also be involved in project consultancy for A&A projects and installation of new digital systems.	• 5 days • Monday to Friday • 8am to 5.30 pm
Emergency Response Specialist	• Relevant operational experience in firefighting, rescue, emergency response, or equivalent uniformed services is an advantage. • Knowledge of HAZMAT response, technical rescue, or marine emergency operations is preferred. • Capable of performing physical tasks and able to meet the demanding requirements of emergency response duties. • Strong situational awareness,	• Respond promptly and effectively to a wide range of emergency incidents, including: • Structural and industrial fires • Hazardous material (HAZMAT) releases • Land equipment and marine interface rescue operations • Medical emergencies • Execute emergency response operations across diverse port facilities such as terminals, automated yards, vessel berths, and automobile terminals. • Support on-site operations with relevant government agencies and internal stakeholders to ensure safe and effective incident management. • Apply advanced firefighting, rescue, and mitigation techniques in high-pressure, fast-moving scenarios.	• Rotating Shifts • 8am to 6pm • 6pm - 8am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- problem-solving skills, and ability to perform under pressure. • Willingness to work shifts, including nights, weekends, and public holidays. • Effective communication skills and the ability to coordinate with multiple stakeholders during emergencies. • Min. N Level / Nitec in any discipline • Served as a fire fighter with SCDF during National Service	• Conduct post-incident stabilisation, recovery support, and operational continuity activities. • Participate in emergency preparedness initiatives, including training, drills, audits, and equipment readiness checks. • Support capability development in emerging risk areas (e.g., electric vehicle fires, alternative fuels). • Contribute to a culture of safety, innovation, and continuous improvement within the Emergency Response team.	
Equipment Engineer	• Engineering degree. • Passion for technology • Willing to work outdoors & at heights	• Troubleshoot, repair, maintain & modify automotive, hydraulic, mechanical & electrical systems used in container handling. • Participate in equipment modification projects to improve equipment reliability, maintainability and sustainability.	• 5 days • Monday to Friday • 8am to 5.30 pm
Equipment Planning Assistant	• At least 3 'O' level credits or NITEC • Proficient in MS applications including Excel and Word	• Support workshop maintenance operations by coordinating equipment servicing, maintaining accurate records, and ensuring compliance with inspection and regulatory requirements.	• 5 days • Monday to Friday • 8am to 5.30 pm
Executive Service Engineer (M&E Services)	• Diploma in Electrical or Mechanical Engineering • At least 2 years experience in the design and / or maintenance of either electrical building services or M&E equipment • Willing to work in Tuas	• You will work with a team of project engineers to manage and supervise M&E installation projects for new port facilities and buildings at PSA Tuas Mega Port. You will work with design consultants and contractors to handle the development projects from design inception to completion to ensure compliance with building regulations and specifications. After project completion, you may continue to lead the facilities maintenance team in the operation	• 5 days • Monday to Friday • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		and maintenance of the M&E facilities.	
Health Safety & Security Duty Manager	• Degree or Diploma with at least 5 years of relevant experience • Hold leadership roles in SCDF or SPF • Those from SCDF Specialist track (EMT, Hazmat, Marine) or SPF/ security related positions are preferred • Candidates with FSM certification will have an added advantage • Able to meet fitness requirements of the job and can perform shift duties	• Lead the Emergency Response team during emergency incidents • Plan Health Safety & Security and fire awareness programmes, trainings and inspections • Coordinate with government agencies on fire, security and pandemic follow-ups • Plan and coordinate fire, rescue and station drills; and red teaming drills • Develop maintenance schedule for operational equipment and vehicles • Manage security service provider • Ensure compliance of ISPS & CERT requirements • Prepare and review contingency plans, SOPs and other related plans/ practice	• Rotating Shifts • 8am to 6pm • 6pm - 8am
Inventory Planner	• NITEC or equivalent, preferably in logistics, supply chain or engineering • Relevant experience in inventory control, supply/demand planning or logistics operations, preferably for engineering spare parts • Proficient in Excel; Power BI knowledge is an advantage • Familiar with ERP systems such as Maximo or Oracle • Good communication and email writing skills	• He/she will monitor inventory levels and plan for replenishment, raise Purchase Requisitions and coordinate with procurement, warehouse and engineering teams. You will support inventory data preparation using Excel and Power BI and disposal of obsolete inventory.	
Mechanical Engineer (M&E Services)	• Degree in Mechanical Engineering • Familiar with local Code of Practices, Building and Fire Safety Regulations	• Lead a team of technical staff in the maintenance of M&E facilities in buildings and container terminals. You will also oversee M&E projects from design inception to completion, ensuring compliance with building regulations and specifications; and be	• 5 days • Monday to Friday • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Preferably with experience in the design and/or maintenance of M&E equipment and systems used in buildings • Willing to work in PSA Tuas Terminal	responsible for project management and site supervision of M&E installations.	
Operations Assistant (Tuas Customer Service Assistant)	• Minimum GCE 'O' Levels or NITEC in any discipline • Willing to work on rotating shifts • Good working knowledge of MS Excel and Powerpoint • Ability to pay meticulous attention to details • Good organisational and time management skills	• Your main duty is to assist in the vehicle management which includes basic management of vehicle keys and spare radio sets, coordination of vehicle servicing and cleaning, and handling of haulier chassis parking applications. In addition, you will also be involved in vessel file closing, printing and prepare ship boarding documents, file waiver operations for overstayed dockages, handle water vouchers and updating of usage meter, and handle basic phone enquiries. • Office will be located at Tuas.	• 12 hours rotating shift • 7.30am - 7.30pm • 7.30pm - 7.30am
Operations Executive	• Degree in any discipline. • Strong leadership, communication and interpersonal skills. • Results oriented personality who thrives working in a dynamic environment.	• As an operations executive at control centre, you will lead a team of control center supervisors and responsible for the planning of manpower resources and sophisticated equipment, to ensure the quick turnaround of our vessels and prompt connectivity of our customers' containers. Execute and monitor container handling operations to ensure PSA delivers seamless service to our customers round the clock. • As an operation executive at planning, you will lead a team of ship planners, collaborating with both internal and external stakeholders to meet shift-to-shift ship planning requirements, ultimately ensuring customer satisfaction. • Spearhead container ship planning to achieve optimal cargo distribution for vessel stability, facilitating swift	• 12 hours rotating shift • 7.30am - 7.30pm • 7.30pm - 7.30am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		vessel turnaround and seamless connectivity in PSA SG.	
Operations Supervisor (Yard Planning)	Higher NITEC / NITEC in any discipline	- In charge of export planning: - Involves allocating space for local exporting containers at the Terminal and shifting of the containers across various Terminals, consolidating them at the Loading Terminal where the Loading Vessel will berth at. - Plan and prearrange the lying containers at the yard to ensure smooth loading operations. - Involved in empty container management where you will pick and nominate empty containers to fulfil orders by the liners.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Senior Civil Engineer (Planning & Design)	- Degree in Civil Engineering or Environmental Engineering - Competent in AutoCAD 2D/3Dm and Revit - Knowledge of e-BIM submission system - Has at least 5 years of working experience with BIM related to infra works and sub-utilities like drainage / sewerage - Knowledge of planning, Singapore Green Mark and Corenet eSubmission System - Structural Design Experience - Experience in geotechnical design and interpretation of a Geotechnical Investigation Report	- Be part of a dynamic team to formulate a master plan of Port Terminal civil projects. - Your main responsibilities include planning, designing, implementing and managing projects in port infrastructure and buildings.	5 days - Monday to Friday 8am to 5.30 pm
Senior Electrical Engineer / Electrical	Degree in Electrical Engineering	Lead a team of technical staff in the management and maintenance of low voltage electrical distribution	5 days - Monday to Friday

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Engineer (M&E Services)	• At least 2 years' experience in maintenance and/or design of electrical building services • Holders of Licensed Electrical Worker (LEW) license or personnel who had completed the course in High Voltage Operation for Engineers will have an advantage	system in buildings and container terminals. You will also oversee M&E projects from design inception to completion, ensuring compliance with building regulations and specification; and be responsible for project management and site supervision of electrical installations.	• 8am to 5.30 pm
Senior Engineer / Engineer (Quality Management)	• Degree in Mechanical Engineering • Candidates with experience/knowledge in the following areas will be considered favourably: • Steel structure design to standards such as EN or BS standards • finite element analysis (FEA/FEM)	• Working alongside inspectors and equipment engineers, you will facilitate inspection of the structural integrity of container handling cranes. You will also be involved in reviewing steel structure designs for compliance with relevant codes and safety standards. Areas of interest will include finite-element analysis of structures, failure analysis of components and crane design evaluations.	• 5 days • Monday to Friday • 8am to 5.30 pm
Senior Service Engineer (Construction & Project Management)	• Diploma in Civil Engineering, Construction Engineering, Facilities Management or Building Services • At least 5 years of either project management experience in the construction industry or facilities maintenance experience in commercial/industrial buildings • Experience in construction of building projects with architectural finishes	• Supervise construction works, especially architectural works and M&E installation • Monitor construction progress against planned progress • Conduct regular site safety inspections • Assist in QA/QC • Ensure construction methods are in accordance with approved Method Statements • Liaise with RE/RTO on inspection of structural works • Coordinate with various stakeholders on facilities requirement to ensure operability, functionality and ease of maintenance	• 5 days • Monday to Friday • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	and M&E installation work is preferred • Knowledge of Building Information Modelling will be an advantage • Possesses excellent communication and interpersonal skills • Proficient in MS Work & Excel		
Service Engineer (Digital Systems)	• Diploma in Electrical, Mechanical or Mechatronics Engineering • Experience in maintenance methodology, network and security system will be an advantage • Comfortable with working outdoors and at height	• Working with the engineers and leading a team of technical specialists, you will maintain our electronics and communications systems. These include CCTV, Card Access, Trunk Radio and UPS. You will also provide technical support and consultancy services on these systems. In addition, you will be involved in projects and tenders for procurement of related systems and equipment.	• 5 days • Monday to Friday • 8am to 5.30 pm
Service Engineer (Equipment Engineering)	• Diploma in Electrical, Mechanical or Mechatronics Engineering • Enjoy working outdoors and at height • Willing to work in PSA Tuas Terminal	• Working with the engineers, you will be involved in maintaining container handling equipment and other electrical/mechanical systems; and in the planning and implementation of maintenance and repair activities. You will also supervise and train a team of technical specialists in equipment maintenance.	• 5 days • Monday to Friday • 8am to 5.30 pm
Service Engineer (Infrastructure Management)	• Diploma in Civil Engineering, Construction Engineering, Building or Facility Management or related fields	• Plan, prepare, monitor and update infrastructure maintenance programmes and project schedules • Coordinate and manage contractors on maintenance/project works • Prepare annual budget and expenditure for maintenance/project works • Draft contract specifications for calling of quotation/tender for maintenance/project works • Liaise with government agencies on civil and marine related issues	• 5 days • Monday to Friday • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Service Engineer (Integrated Facilities Management)	Diploma in Civil Engineering, Construction Engineering, Building & Facility Management	- Plan, prepare, monitor and update building facilities operation and maintenance program and project schedules - Prepare annual budget and expenditure for facilities management and maintenance/project works - Draft contract specifications for calling of quotation/tender for facilities management, maintenance/project works - Coordinate and manage contractors on facilities management, maintenance/project works at offices and buildings - Liaise with government agencies on building related issues	5 days - Monday to Friday 8am to 5.30 pm
Technical Specialist (Electrical Network)	- NITEC in Electrical Engineering, NITEC in Electrical Technology (Power & Control) or Integrated Mechanical & Electrical Design - Willing to work outdoors and at heights	Assisting the LEW and engineers in performing preventive and corrective maintenance of electrical systems; supervising new electrical installations and SCADA system testing/commissioning; troubleshooting network fault and performing power supply restoration work.	5 days 8am - 5.30pm - Singapore
Technical Specialist (Equipment Engineering)	- NITEC / Higher NITEC in an engineering discipline - Willing to work outdoors, at heights and on weekends	- Troubleshoot, repair and maintain and modify automotive, hydraulic, mechanical and electrical systems used in container terminal operations. - Participate in equipment modification projects to improve equipment reliability	5.5 days 8am - 5pm - Singapore
Trainee Lashing Supervisor	- Willing to work on rotating shifts and weekends - Able to work at heights	- You will secure containers on vessels using lashing equipment, berth and unberth vessels, carry out wharf operations such as coning and deconing, and assist in water bunkering operations. - Upon completion of the 1 year traineeship programme, you will supervise lashing operations and motivate a team of lashing specialists.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am - Singapore

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Warehouse Assistant	• Able to multi-task and communicate with others	• Support the day-to-day operations within warehouse and support day to day unpacking, picking, re-packing and re-labelling operations. Will also support day to day delivery of parts from warehouse to plant.	• 5 days • Monday to Thursday 8.30 am to 6.00 pm • Friday • 8.30 am to 5.30 pm • Singapore
Workplace Safety & Health Officer	• Degree in Engineering, Environmental, Health and Safety • Keen interest or knowledge in data analytics • Experience in occupational safety, health and environmental field, OSH/ ISO documentation, and knowledge of related government regulations • Candidates who are MOM Registered WSH Officer or with experience / certification in Industrial Hygiene will have added advantage	• Drive workplace safety & health initiatives • Conduct workplace safety & health audit and training • Keeping abreast of best workplace safety and health standards and promoting good practices at work • Perform the statutory roles of a Registered Workplace Safety & Health Officer (RSO) • Ensure corporate compliance with Workplace Safety & Health regulations and statutory requirement	• 5 days • Monday to Friday • 8am to 5.30 pm • Singapore

PSA Marine Pte Ltd

PSA Marine is a leading marine services provider with roots dating back to 1964. Originating from the former Port of Singapore Authority, the company has played an important role in supporting Singapore's development as one of the world's busiest maritime hubs. Today, PSA Marine provides a range of essential marine services, including pilotage, towage and offshore marine support, helping vessels navigate safely and efficiently. Backed by a modern fleet and a team of maritime professionals, PSA Marine serves customers across Singapore and international markets in Asia, the Middle East, Europe and the Americas, supporting the global shipping, port and energy sector.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Marine Assistant	• Possess at least GCE 'N'/'O' Level, Nitec/Higher Nitec Qualifications • Willing to perform shift work	• The Marine Assistant supports the Launch Master by supporting the safe and efficient operation of the craft by performing lookout duties, handling mooring ropes during berthing and unberthing, maintaining cleanliness of the deck, engine room, and wheelhouse, and assisting passengers with safe embarkation and disembarkation.	• Shift Pattern: • Day Night OFF Day Night OFF OFF • 12 hours shift • 7.30 to 7.30
Launch Master	• Possess at least GCE N/O Levels, Nitec/Higher Nitec qualifications; • Possess a valid Port Limit Steersman (PLSM) licence issued by Maritime and Port Authority of Singapore • Willing to perform shift work	• The Launch Master takes command of the harbour launch which provides seaward transportation and supports the safe transfer of passengers when the launch is out at sea. He manoeuvres the launch, assisted by the Marine Assistant, and is overall responsible for the safe navigation and movement of the launch.	• Shift Pattern: • Day Night OFF Day Night OFF OFF • 12 hours shift • 7.30 to 7.30
Fleet Engineering Specialist (Electrical/Mechanical)	• Possess at least a Nitec in Marine Technology, Electrical Engineering or Mechanical Engineering;	• The Fleet Engineering Specialist is responsible for carrying out repair, maintenance, and troubleshooting of machinery onboard PSA Marine harbour crafts to ensure operational reliability. They are also involved in the liaising with the Fleet Operations team on breakdown reports and harbour crafts status. • Electrical • Troubleshoot and carry out thorough rectification of deficiencies in machinery and control system; • Perform wiring and connection of electrical cables;	• Working hrs: 3 kinds, rotated • Normal – 7.30am to 4.30pm, Sat - 7.30am-11.30pm (5.5 day) • Day – 7.30am to 3.30pm, 6 days • Night – 2.30pm to 10.30pm, 6 days

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• Install electrical and electronic accessories and components; • Perform any other duties as assigned. • Mechanical • Perform lathe machining, basic gas welding, and cutting works to facilitate repair to machinery; • Assist in lifting activities, forklift operation, confined space assessment; • Perform proper disposal of used oils and chemicals; • Perform any other duties as assigned.	
Assistant Operations Executive (Mission Command Centre)	• Possess at least a Diploma or equivalent; • Have good communication and interpersonal skills; • Be able to remain calm and make logical decisions under stress and emergency circumstances; • Be willing to perform overnight shift work.	• Take leadership in the planning and deployment of pilotage, harbour towage and waterboat resource to support 24/7 operations of the busiest port in the world; • Uphold the efficiency of company's services which is part of Singapore maritime ecosystem; • Directly communicate with vessels to coordinate arrival and service timings; • Attend to all customer queries and request new orders, amendments and cancellations; • Perform any other duties as assigned.	• Shift Work • 12 hours shift • 7.30 to 7.30 • 8/9 hr flexi shifts
Driver	• Possess valid Class 3 / Class 3A driving licence; • Possess good driving record with relevant experience; • Be willing to perform shift work;	• Responsible for ferrying harbour pilots or other approved persons as assigned by the Mission Command Centre, safely and on time; • Familiar with berth locations in the port terminals and routes to and from these places; and • Ensure the proper running, use, care and cleanliness of the assigned vehicle.	• Shift Work • Morning: 0700 to 1500 • Afternoon: 1500 to 2200 • Night: 2200 to 0700
Deputy Operation Executive (Engineering)	• Possess at least Nitec/Higher Nitec qualifications; and	• Carry out daily inventory store activities;	• 5.5 days work week, alt Sat • Mon to Fri: 7.30am to 4.30pm,

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Inventory, Warehouse, Store)	• Be willing to perform shift work.	• Receive, inspect, and verify incoming materials, goods, and supplies against delivery documentation; • Issue materials and products in accordance with authorized requests and record all stock movements; • Work with inventory store manager-in-charge to review process workflow and implement process improvements to increase efficiency and effectiveness; • Ensure safe, proper and effective housekeeping of inventory store; • Issue items, update inventory and monitor stock levels; • Manage disposal of waste and carry out regular inspections of inventory store items and storage conditions; • Label, store and file stock items and ensure all required documentation are completed; • Conduct regular stock takes, support reconciliation and compile necessary reports; • Allocate storage space and ensure safe equipment handling at all times; • Participate in innovation and work improvement projects; • Perform any other duties as assigned.	• Sat: 7.30am to 11.30am
Executive/Senior Executive (Engineering Inventory Management)	• Diploma/Degree in engineering, engineering procurement or engineering supply chain or equivalent; • 2 to 3 years of experience in inventory management, warehousing or engineering procurement preferably in an industrial, engineering or marine environment;	• Maintain accurate, real-time records of engineering spares, components and materials using asset management and enterprise systems like Oracle or similar ERP tools. • Monitor inventory levels to prevent stock-outs of critical maintenance items while minimising excess or obsolete stock. • Raise purchase requests, track order status and liaise with vendors/procurement teams using enterprise software and other platforms to ensure timely delivery of necessary supplies. • Organise and maintain the Engineering inventory store, ensuring	• 5 days work week • Office Hours

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Proficient in inventory management software and Microsoft Office suite (especially Excel); and • Strong ability to analyse inventory data, identify consumption trends and optimise ordering and stocking.	• proper storage, labelling, and handling of spares, components and materials. • Conduct regular physical stock checks and cycle counts, reconciling them with system records and other data sources to investigate discrepancies. • Ensure all inventory activities comply with governance standards as well as safety regulations and company policies. • Coordinate with Engineering managers to plan and prepare spares, components and material requirements for preventive maintenance programs and corrective maintenance activities. • Lead the Engineering inventory store team and take charge of day-to-day operations for the inventory store. • Partner Engineering, Procurement and Finance managers to identify opportunities for process reviews and carry out required improvements.	
Fleet Engineer / Executive Fleet Engineer (Automation)	• Bachelor's degree in Marine, Mechanical, Electrical or equivalent; • Good cross-discipline knowledge in Mechanical and Electrical Engineering domain; • Strong knowledge of electrical and instrument systems and familiar with electrical schematics diagram and symbols; • Leadership qualities and flair for problem-solving and project management skills; • Interpersonal skills with the ability to build	• Organise, lead and deploy a team of Fleet Engineering Specialists to carry out maintenance and repair work of machineries and equipment onboard marine crafts; • Update Fleet Engineering Management team on the daily manpower deployment; • Coordinate with Fleet Operations team daily for repair and maintenance of marine crafts and to provide feedback on readiness of marine crafts for operations; • Take lead in driving Fleet innovation and/or newbuild projects; • Review inventory and non-stock items and propose recommendations to stock spares for maintenance and repair work; • Plan and monitor the maintenance schedule of all equipment onboard marine crafts and in the workshop;	• 5.5 day work week • Mon to Fri: 7.30am to 4.30pm, • Sat: 7.30am to 11.30am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	cordial and effective working relationships; • Communications skills which includes written and presentation skills; and • More experienced candidates may be considered for a senior position.	• Engage external stakeholders (e.g. shipyards) to carry out scheduled docking and project management of the jobs; • Develop plans for the learning and development, performance and discipline of the team of Fleet Engineering Specialists; • Mentor, coach and motivate the team of Fleet Engineering Specialists to achieve the relevant targets and outcomes; • Work with the key managers to co-create a conducive working environment; • Upkeep and maintain proper documentation records of all assets, jobs done, purchase for spares, special tools and manpower utilisation; and • Identify emerging technologies and its application to the operations.	
Trainee Harbour Pilot	• Have a Certificate of Competency (Deck) Class 1 or 2 or if not, at least a Certificate of Competency (Deck) Class 3 with minimum 6 months officer of watch experience; RSN Officers with at least four years' fleet experience are also invited to apply; • Have good communication and interpersonal skills; and • Be willing to work shifts.	• Candidates are expected to provide pilotage and berthing services to vessels calling at Port of Singapore and ensure the safe and expedient movement of vessels entering and departing the port, while complying with port regulations and emergency response plans. Vessels piloted include mega container ships, tankers and passenger liners.	• Shift Work • Shift Hours
