#1 AIRTS Pte Ltd

AiRTS® is the creator of GenAI Twin®.

GenAI Twin® is a patented enterprise AI technology — not available anywhere in the world — purpose-built for strategic enterprise applications. Unlike generic AI chatbots, GenAI Twin® eliminates randomness and hallucinations plaguing GenAI models, but retains the cognitive capabilities similar to the cognitive capabilities of your trained employees.

GenAI Twin® is like a virtual twin of an entire group of employees, capable of operating in any functional role, performs end-to-end tasks to produce actual work outputs, and executes tasks based on the unique policies and procedures of each enterprise.

Job Positions	Pre-requisites	Working Hours / Location
1. AI Engineer	Job Description: - Client Engagement and Needs Assessment: - Work closely with clients to understand their business challenges and objectives. - Conduct detailed assessments to identify opportunities for AI integration and applications for clients at enterprise level. - Solution Design and Proposal: - Develop tailored AI solutions that address specific client needs. - Create detailed project proposals, including timelines, budgets, and resource requirements. - Technical Implementation: - Lead the development and deployment of AI models and systems. - Ensure seamless integration of AI solutions with clients' existing infrastructure. - Project Management: - Oversee AI projects from inception to completion, ensuring they meet client expectations. - Manage project timelines, deliverables, and stakeholder communications. - Data Management and Analysis: - Guide clients in data collection, cleaning, and preprocessing. - Develop and implement machine learning models and algorithms. - Performance Monitoring and Optimization: - Monitor the performance of deployed AI systems. - Optimize models and systems based on performance metrics and client feedback. - Training and Support: - Provide training to client teams on AI tools and best practices. - Promote internal sharing of knowledge and exchange of ideas in terms of AI tools and best practices. - Ethical and Regulatory Compliance: - Ensure AI solutions designed and deployed comply with relevant ethical guidelines and regulations. - Address issues related to data privacy, bias, and transparency. - Innovation and Research: - Stay updated on the latest AI trends and technologies.	5 days - Cecil Street

Job Positions	Pre-requisites	Working Hours / Location
	- Experiment with new AI techniques to offer cutting-edge solutions to client. Job Requirement: - Design, develop, and implement AI models and algorithms to solve complex problems. - Collaborate with cross-functional team members to integrate AI solutions into existing platforms for clients or internally. - Conduct research to stay updated with the latest advancements in AI and machine learning. - Optimize and fine-tune AI models for performance and scalability. - Analyze and interpret data to provide actionable insights. - Develop and maintain documentation for AI models and processes. - Participate in code reviews and provide constructive feedback to team members.	
2. Cloud Solutions Architect	Job Description: - We are on the lookout for a solution architect to construct total solutioning proposal includes USP (Unique Selling Point) of offering and pricing, high level scope of both functional and technical requirements, data and security blueprint, resources planning and timeline during pre-sales stage by closely cooperating with sales lead and senior stakeholders. Job Requirement: - The candidate will design and deliver complex cross-domain solutions encompassing a rich variety of technologies and using a mixture of agile and planned methods to provide innovative solutions to address clients' needs. - He/ she will also work with internal and external stakeholders, client executives, partners, external vendors, and project members to manage and deliver successful solutions during implementation stage. - The ideal candidate will participate in or to drive deep architectural discussions to build trust and rapport with clients during implementation stage, and he / she is expected to be proactive to keep abreast of new technologies and to promote the adoption of new initiatives on client side or internally. - He / she is also expected to be a trusted technical advisor to clients and project members to solve complex technical challenges and establish credibility & build deep relationships with senior technical individuals within internal and client organization.	5 days - Cecil Street
3. Technical Project Delivery Manager	Job Description: - Design and deliver complex cross-domain solutions encompassing a rich variety of technologies and using a mixture of agile and planned methods to provide innovative solutions to address clients' needs. - Collaborate with client's stakeholders and technical teams to develop strategic transformation plans, so as to achieve their objectives and implement continuous improvements and change initiatives.	5 days - Cecil Street

Job Positions	Pre-requisites	Working Hours / Location
	• Work with internal and external stakeholders, client executives, partners, external vendors, and project members to manage and deliver successful solutions during implementation stage. • Participate in or to drive deep architectural discussions to build trust and rapport with clients during implementation stage. • Lead projects relating to cloud adoption, tech refresh, application modernisation projects, developing reference architectures in compliance with architecture standards, IT security, data governance, to improve operational efficiency. • Develop and maintain strong relationships with clients, understanding their business challenges and objectives. • Conduct detailed needs assessments to identify opportunities for our technical products and solutions. • Present and demonstrate our products and solutions to clients, highlighting their unique value propositions. • Be proactive to keep abreast of new technologies and to promote the adoption of new initiatives on client side or internally. • Be a trusted technical advisor to clients and project members to solve complex technical challenges and establish credibility & build deep relationships with senior technical individuals within internal and client organization.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	Stay up to date with the latest security trends, tools, and techniques.		
	Job Requirement: - Bachelor's Degree in Cyber Security - OSCP, CREST, BSCP		

#4 HRS TALENTS PTE LTD

HRS Talents is a talent solutions company based in Singapore, dedicated to connecting top cybersecurity professionals with leading organisations. We understand the unique challenges and demands of the cybersecurity industry influenced by the constantly evolving threat landscape, and aim to provide tailored solutions to help businesses build their teams and protect their digital assets.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
1. Cybersecurity Intern	Job Description: - Vulnerability Assessment: Assist in testing and scanning client networks and web applications for security gaps. - Security Reviews: Support the evaluation of various applications, networks, and IT platforms. - Risk & Threat Analysis: Help analyze vulnerabilities and research new, emerging cyber threats. - Policies & Documentation: Assist in reviewing and updating information security frameworks, policies, and procedures. - Reporting: Help prepare clear reports and findings to present back to our clients. - Incident Support: Shadow and assist the team during real-world incident response and digital forensics cases. Job Requirement: - Analytical Mindset: An ability to look at data from multiple sources, spot potential issues, and brainstorm solutions. - Educational Background: A degree (or current enrollment/certification program) in Cybersecurity, Information Systems, Computer Engineering, Data Analytics, or a related field. - Foundational Knowledge: A solid grasp of basic computer networking concepts, common cyber threats, and malware types. - Familiarity with Frameworks: Awareness of basic cyber threat models (like MITRE ATT&CK, Cyber Kill Chain, or the Diamond Model) is a major plus.		5 days - Robinson Road
2. Security Engineering Intern	Job Description: - Vulnerability Assessment & Testing (VAPT): Assist our team in scanning and identifying potential security gaps in client networks, web applications, and platforms. - Incident Response & Research (DFIR): Shadow live cases and conduct research into emerging malware strains, vulnerabilities, and cyber threat intelligence. - Consultancy & Compliance Support: Help evaluate client security frameworks against international standards and frameworks (such as Singapore's Cyber Trust Mark).		5 days - Robinson Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	Reporting & Documentation: Assist in drafting technical finding reports and building mitigation roadmaps to improve our clients' overall security posture.		
	Job Requirement: - Academic or Training Background: Currently pursuing a diploma/degree or transitioning through a formal cybersecurity/IT conversion program. - Core Fundamentals: A basic understanding of computer networking, system security, and common web application vulnerabilities. - Familiarity with Cyber Concepts: Basic awareness of threat models (e.g., MITRE ATT&CK) or an interest in offensive/defensive security tools. - Mindset: A strong analytical mindset, excellent communication skills, and a genuine eagerness to continuously learn from seasoned professionals.		
3. Security Support Engineer	Job Description: - Provide support for assigned security platforms, including onsite troubleshooting, root cause analysis, incident reports etc. - Manage ticket queue and take ownership and responsibility of tickets assigned, within agreed SLA. - Perform change requests activities per change window allocated, including planning, review, tracking & verification and documentation. - Ensure that daily operations and tasks are properly completed or followed up. Job Requirement: - Bachelor's degree in Computer Science, Information Technology, or a related field; or equivalent work experience. - Hands-on experience with security platforms and tools (e.g., SIEM, IDS/IPS, endpoint protection). - Familiarity with change management processes and methodologies. - Strong analytical skills with the ability to identify, analyze, and resolve security issues.		5 days - Robinson Road

#5 INFO-TECH SYSTEMS LTD

Established in 2007 and listed on the Mainboard of the Singapore Exchange Securities Trading Limited on 4 July 2025, Info-Tech Systems Ltd. is a leading one-stop Software-as-a-Service ("SaaS") solutions provider for Small and Medium Enterprises ("SMEs").

The Group's platform, anchored by its flagship Human Resource Management Software has expanded to Accounting, Customer Relationship Management solutions and digital training programmes through Info-Tech Academy. Info-Tech today delivers an integrated, cloud-based ecosystem supporting workforce, financial, and customer management functions, enabling organisations to manage their workforce, finances,

and sales seamlessly within a single platform. Strategically targeted at SMEs, Info-Tech's solutions are secure, scalable, and designed to automate processes, improve visibility, and enhance productivity.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
1. Business Development Executive	Job Description: - Act as the first point of contact for inbound leads, engaging prospects to understand their business challenges and HR digitalisation needs. - Qualify leads and recommend suitable Info-Tech solutions aligned with client requirements. - Conduct product demonstrations and sales presentations to prospective clients. - Manage the full sales cycle from initial engagement through deal closure, ensuring a smooth handover to the implementation team. - Proactively identify and reach out to new prospects through outbound canvassing when inbound lead volume is low. - Build and maintain strong, long-term client relationships to drive customer retention and referrals. - Consistently achieve individual monthly sales targets and contribute to overall team performance goals. - Maintain accurate and up-to-date records of sales activities, opportunities, and pipeline status in the CRM system. - Collaborate closely with internal teams to improve lead quality, conversion rates, and overall customer experience.		5 days - Bendemeer Road
	Job Requirement: - Proven experience in business development, sales, or account management (B2B experience preferred). - Strong communication and presentation skills, with the ability to engage HR professionals, business owners, and senior stakeholders. - Comfortable managing both inbound leads and proactive outbound sales activities. - Target-driven mindset with the ability to take ownership of the sales pipeline. - Strong organisational skills with the ability to manage multiple opportunities simultaneously. - Experience using CRM systems to track sales activities and performance. - Team-oriented with a collaborative approach to achieving shared goals. - Candidates with Accounting knowledge is strongly encouraged to apply.		
2. Corporate Course Consultant	Job Description: - Follow-up any inbound customer enquiries given by the company - Source, prospect, and secure new corporate clients for WSQ training programs - Conduct client meetings and presentations to understand training needs and propose suitable course solutions - Maintain and grow relationships with existing accounts for repeat business - Meet and exceed monthly sales targets and KPIs		5 days - Bendemeer Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Collaborate with internal teams (Academy, Operations, and Partnerships) to ensure smooth onboarding and delivery - Keep updated on WSQ frameworks, government funding schemes, and relevant training trends - Prepare proposals, quotations, and post-sale reports as needed		
	Job Requirement: - Diploma or Degree in Business, Sales, or related field 1–3 years of B2B sales experience, preferably in training, education, or HR services - Self-starter with a strong ability to hunt for leads and work independently - Excellent communication and negotiation skills - Good understanding of corporate training needs and sales cycles - Prior knowledge of WSQ or government-funded training programs is a plus. - Keep updated on WSQ frameworks, government funding schemes, and relevant training trends		
3. Partnership Executive	Job Description: - Identify, evaluate, and establish strategic partnerships with industry players, organizations, associations, and influencers to generate partner referrals and drive channel sales. - Develop and maintain strong relationships with partners, understanding their business models, needs, and objectives to create mutually beneficial collaboration opportunities. - Drive partner recruitment initiatives by identifying potential partners, presenting partnership value propositions, and negotiating partnership agreements. - Work closely with internal sales and marketing teams to develop partner referral programs, joint campaigns, and promotional initiatives to increase partner engagement and pipeline generation. - Enable partners with the necessary knowledge, resources, and support to effectively promote and refer our solutions. - Monitor and track partner performance metrics, providing insights and recommendations to optimize partner programs and maximize channel-driven revenue. - Stay informed on industry trends, ecosystem developments, and competitor activities to identify new partnership opportunities and maintain a competitive advantage. Job Requirement: - Bachelor's degree in business administration, Marketing, or a related field. 1–3 years of experience in partnership development, business development, channel sales, or account management. - Strong relationship-building abilities with the capacity to engage stakeholders across different organizations and seniority levels. - Excellent communication, negotiation, and interpersonal skills.		5 days - Bendemeer Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Strategic thinker with strong analytical and problem-solving capabilities. - Self-motivated, proactive, and able to work both independently and collaboratively in a fast-paced environment. - Experience working with SMEs, SaaS, HR technology, or digital solutions will be an advantage		
4. Sales Admin	Job Description: - Attend to all in-coming calls on sales enquiries and repair calls - Maintain consistent contact with existing clients - Preparation of sales quotation and follow up with customers on confirmed sales orders - Provide support to Technical team on appointment setting and coordination work - Arrangement of site survey on customer enquiries - Any other related administrative duties as assigned by superiors		5 days - Bendemeer Road
	Job Requirement: - Candidate should possess 'N'/'O' level/ Diploma / professional qualifications in any field. - Minimum of 2-3 years of working experience in general clerical/administrative duties/sales coordination/customer service-related work. - Knowledge in Microsoft Office applications, internet savvy. - Result and customer-oriented individual who possess initiative and excellent interpersonal skills. - Strong negotiation skills - Strong communication and presentation skills - Proactive team player with the ability to work independently. - Ability to work under pressure in a fast-paced working environment. - Responsible work attitude with a positive and cheerful personality.		
5. Sales Canvasser	Job Description: - Actively prospect and generate leads through methods such as door-to-door canvassing, cold calling, networking, and other creative outreach strategies. - Pitch Info-Tech's SaaS solutions to potential clients, identifying pain points and offering tailored solutions. - Develop and maintain a robust sales pipeline, ensuring consistent follow-ups and updates. - Achieve or exceed individual sales targets and KPIs. - Work closely with the sales team to share insights and refine strategies. - Maintain accurate records of sales activities and customer interactions in the CRM system		5 days - Bendemeer Road
	Job Requirement: - Minimum Diploma/ITE qualification in Business or similar. - Proven track record in sales, experience in SaaS or technology solutions is a bonus - Exceptional interpersonal and communication skills.		

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Self-motivated, competitive, and hungry to exceed targets. - Ability to thrive in a fast-paced environment and adapt to changing dynamics. - A high level of resilience and determination to overcome objections and close deals. - Experience in door-to-door canvassing, cold calling, or similar proactive sales methods is a strong advantage.		
6. Sales Executive (Roadshow)	Job Description: - Represent the company at roadshows, outreach events, and public venues to promote WSQ courses - Approach and engage potential learners, understand their upskilling needs, and recommend suitable programs - Achieve daily/weekly sign-up and outreach targets - Provide accurate course and funding information to walk-in prospects - Collect and manage leads for follow-up and conversion - Set up and maintain event booths professionally and in line with brand guidelines - Report on outreach activities and provide feedback to improve effectiveness		5 days - Bendemeer Road
	Job Requirement: - Nitec, Diploma, or equivalent qualification - Prior experience in roadshows, tele sales, or front-line customer engagement is preferred - Confident communicator who's comfortable approaching people in public settings - Sales-driven mindset with the ability to meet and exceed targets - Willingness to work weekends or evenings during event periods - Basic understanding of WSQ or Skills Future course funding is a bonus		

#6 INNOWAVE TECH PTE. LTD.

Innowave Tech is an Artificial Intelligence (AI) company offering solutions for the Semiconductor and Advanced Manufacturing industry. Utilizing deep industrial domain knowledge, proven experience, and innovation. We provide expert AI solutions and systems to address various industry pain points.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
1. Admin Executive (HR and Finance)	Job Description: - This is an on-site, full-time role based in Singapore for an Administrative Executive specializing in HR and Finance. - The incumbent will be responsible for managing executive-level administrative tasks, overseeing general office administration, supporting communication and coordination within internal teams, and contributing to HR and finance functions. - This role involves handling documentation, assisting in reporting, and ensuring efficient operational processes while		5 days - Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	maintaining high levels of professionalism and confidentiality in our growing SME company. - This role is ideal for someone who enjoys variety, takes initiative, and thrives in a dynamic environment. 2. Automation Engineer (Field Service)	Job Description: - As an Engineer, you will be involved in: - Studying & understanding the Specifications of Customer requirements /needs - Customer on-site assessment and troubleshooting - Brainstorming proposals to address customer requirements / needs - Sourcing / selecting compatible components for the proposed design - Preparation of estimated budget for the proposed design - Conduct of Design Review sessions - Detailing of Design with GT&T, Material Selection, Heat Treatment & Finishing - Preparation of Bill of Material (Fabrication) & (Commercial) - Preparation of Assembly & Pneumatic Drawings - Assisting in assembly & troubleshooting of Sub-Modules - Testing & Troubleshooting of Equipment - Assist in Buyoff of Equipment - Preparation of Operation Manual - Fundamental Project Management Job Requirement: - Diploma/Degree in Mechatronics, Mechanical or Electronics Engineering - Min. 2 to 3 years' experience in Automation / Semiconductor sector - Able to understand electrical & pneumatic circuitry drawing - Experience in field service engineering is a requirement - Experienced in wiring and soldering - Experience in basic circuitry design is a plus - Leadership and project management skills - Knowledge in Programming & Embedded system (eg. Arduino, Python, C++, C#, RPI, etc)		5 days - Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	Knowledge in Drafting & Simulation software (AutoCAD, NanoCAD, Fusion360, SolidWorks, etc) is a plus		
3. Business Development Manager	Job Description: - Innowave Tech Pte Ltd is actively expanding into the semiconductor and advanced manufacturing industry and is seeking a highly motivated and experienced Business Development Manager to spearhead our efforts in this pivotal sector. - The ideal candidate will possess a successful track record of driving business growth and fostering strong relationships within the semiconductor and advanced manufacturing industry. Job Requirement: - Bachelor's or master's degree in business, marketing, or a related field. - Minimum of 8 years of experience in business development, sales, or marketing within the technology industry, with a proven track record of driving growth in the semiconductor market. - In-depth understanding of the semiconductor and advanced manufacturing industry in Singapore, including its unique business culture, and adeptness in navigating complex business environments. - Exceptional communication and negotiation skills, with fluency in Mandarin (to liaise with Mandarin speaking stakeholders) and English. - Demonstrated ability to cultivate and maintain strong relationships with key stakeholders, including government officials, industry associations, and potential customers. - Proven ability to work independently and collaboratively as part of a team, exhibiting excellent project management and organizational skills. - Preferred experience with AI or related technologies, which are increasingly relevant in the semiconductor and advanced manufacturing industry.		5 days - Paya Lebar Road
4. Data Scientist	Job Description: - We are seeking a Data Scientist with an interest in data analytics, insight generation, and optimization for manufacturing data. - In this role, you will work independently alongside senior data scientists to analyze manufacturing datasets involving time-series sensor data, develop statistical analysis, and explore AI/ML. - This role will focus on analyzing complex manufacturing datasets, developing predictive models, and implementing solutions for customers. Job Requirement: - Minimum Poly, Bachelor's, or Master's degree in Data Science, Statistics, Computer Science, Operations Research, Applied Mathematics, Engineering, or a related field. - Proficiency in Python.		5 days - Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Solid understanding in statistical analysis and machine learning/deep learning frameworks (Scikit-learn, LightGBM, XGBoost, TensorFlow, PyTorch). • Experience in data visualization (Plotly, Seaborn, etc.). • Knowledge in software engineering best practices (modularity, version control, testing). • Ability to work in cross-functional teams and communicate insights effectively. • Strong problem-solving mindset and attention to detail. • Self-motivated learner who quickly adapts to new tools and technologies. • Bonus Skills: Knowledge of IoT data and manufacturing processes. • Experience in deploying models. • Experience with LLM (prompt engineering, RAG).		
5. Forward Deployment Engineer	Job Description: • We are looking for a Forward Deployment Engineer to implement and support AI solutions in manufacturing environments. • The role involves working closely with customers to understand their operational needs, deploying AI systems, troubleshooting technical issues, and ensuring successful implementation. • You will collaborate with engineering and product teams to improve solutions, enhance system performance, and help deliver practical AI applications that create value for customers. • Strong problem-solving, communication, and teamwork skills are essential. Job Requirement: • Candidates must be legally eligible to work in Malaysia or Singapore without the need for work pass or visa sponsorship. • A Degree in Computer Engineering, Computer Science, Electrical Engineering, or a related field is preferred. • Applicants should have strong problem-solving and communication skills, be able to work independently and as part of a team and be willing to learn new technologies. • Experience in manufacturing, system integration, data systems, or AI-related projects will be an advantage. • Candidates should also be willing to travel when required to support project deployment and customer needs.		• 5 days • Paya Lebar Road
6. IoT Engineer	Job Description: • We are looking for a Lead IoT Engineer to spearhead the end-to-end development of our IoT products. • This role covers hardware, firmware, and software integration, with a strong focus on product lifecycle management. You will lead a small team of engineers, work closely with clients, and collaborate across product, operations, and manufacturing teams to deliver production-ready solutions. • Lead the end-to-end development of IoT solutions, covering hardware, firmware, and software.		• 5 days • Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Manage the full product lifecycle from concept and prototyping to pilot and production. - Provide technical leadership for a small team engineers, including mentoring, task allocation, and design/code reviews. - Engage directly with clients for requirement gathering, solution presentations, and troubleshooting. - Oversee project management activities: timelines, documentation, and risk tracking. - Collaborate with product managers, operations, suppliers, and manufacturing teams.		
	Job Requirement: - Bachelor's degree in Electrical/Electronic Engineering (EE/EEE), or equivalent experience. 3+ years of experience in IoT, embedded systems, or related product development. - Prior team leadership and product development experience preferred. - Background in semiconductors, industrial IoT, or automation industries preferred. - Technical Skills - Hardware: PCB design, electronics fundamentals, sensors, microcontrollers (STM32, ESP32), industrial protocols (Modbus, CAN, RS485). - Firmware: C/C++ for MCUs, RTOS, Linux device drivers, low-level debugging. - Software: Python, Node.js (or similar) for middleware; cloud integration (AWS/Azure); containerization (Docker, Kubernetes). - Networking: TCP/IP, MQTT, HTTP/REST APIs, and security protocols. - Tools: Altium/KiCad, Git, Jira, CI/CD pipelines.		
7. Optical Engineer	Job Description: - Design and optimize optical systems for industrial imaging and automated inspection - Develop multi-spectrum solutions (VIS, IR, UV, laser, structured light) for high-contrast, high-precision defect detection - Support 3D vision systems (structured light, stereo, depth sensing) - Balance image quality, system performance, and BOM cost for scalable factory deployment - Collaborate with AI, vision software, and hardware teams on full system integration - Validate performance using MTF, SNR, distortion, and real-world factory testing		5 days - Paya Lebar Road
	Job Requirement: - Degree in Optical Engineering, Physics, Electrical Engineering, or related field - Strong experience in optical system design & simulation - Hands-on experience with multi-spectrum imaging systems		

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Solid understanding of lenses, sensors, illumination, and imaging pipelines • Bonus Points: Experience with 3D vision technologies • Experience in Automated Optical Inspection (AOI) for semiconductor or precision manufacturing		
8. PHP	Job Description: • We are looking for a Full Stack Web Developer to develop, maintain, and enhance web applications. • The role involves working on both front-end and back-end development, collaborating with internal teams to implement new features, improving system performance, and ensuring applications are secure, scalable, and user-friendly. Job Requirement: • Candidates must be eligible to work in Singapore due to MOM quota requirements. • A Diploma or Degree in Computer Science, Information Technology, Software Engineering, or a related field is required, with at least 2 years of experience in Full Stack Web Development. • Applicants should be proficient in Laravel and ReactJS, with knowledge of HTML, CSS, JavaScript, RESTful APIs, Git, and database management. • Familiarity with Docker, Kubernetes, web security practices, and software testing is preferred. • Strong problem-solving, communication, and teamwork skills are essential.		• 5 days • Paya Lebar Road
9. Project Manager	Job Description: • As a Project Manager, you will lead and coordinate AI, computer vision, and automation projects for semiconductor and advanced manufacturing clients. • You will manage project delivery from planning to deployment, serve as the main point of contact for clients, coordinate cross-functional teams, monitor project timelines and budgets, and ensure successful project execution. Job Requirement: • Bachelor's degree in Engineering, Computer Science, or a related field, with at least 3 years of project management experience in technology, AI, manufacturing, or related industries. • Candidates should possess strong communication, stakeholder management, and organisational skills, and be proficient in both English and Chinese (Mandarin). • Experience in semiconductor manufacturing, AI/computer vision projects, or project management certifications will be an advantage		• 5 days • Paya Lebar Road
10. Senior Data Engineer	Job Description: • We are seeking Senior Data Engineer to establish and lead our data infrastructure. • The successful candidate will be responsible for building our data engineering practice from the ground up, implementing robust data systems for industrial AI applications, and		• 5 days • Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	establishing best practices that will power our semiconductor manufacturing AI solutions. As our first Senior Data Engineer, you will have a foundational role in building robust data infrastructure to handle manufacturing data and LLM applications, while establishing secure data practices that power our AI solutions for advanced manufacturing operations.		
	Job Requirement: - Minimum Poly or Bachelor Degree in Computer Science, Engineering, or a related field. - Only Singaporean or Singapore PR can apply due to project requirement. 3+ years of experience in data engineering roles, ideally with on-premises or hybrid infrastructure. - Proven track record of building scalable data systems from ground up in a startup environment. - Proficiency in Python and/or Java for data pipeline development. - Solid experience with ETL frameworks (e.g., Apache Airflow, Dagster) and streaming systems (e.g., Kafka). - Experience designing and maintaining SQL and NoSQL databases. - Experience building and operating data lakes and data catalog. - Familiarity with containerization (Docker), version control (Git), and CI/CD practices. - Excellent communication skills and ability to collaborate with cross-functional technical and non-technical teams. - Excellent problem-solving and debugging abilities. - Ability to balance engineering tradeoffs. - Bonus Skills: Experience with manufacturing data systems, especially SPC, SCADA, and industrial sensor protocols (e.g., OPC UA, MQTT, Modbus). - Familiarity with AI/ML pipelines and tools (e.g., MLflow). - Knowledge in vector databases and LLM data infrastructure. - Prior experience working in or with regulated industries (e.g., semiconductor, automotive, aerospace).		
11. Senior Data Scientist	Job Description: - We are seeking a highly skilled Data Scientist with expertise in data analytics, insight generation, and optimization for manufacturing data. - The ideal candidate will leverage AI/ML, optimization algorithms, and various advanced analytics techniques to drive operational efficiency and process improvements. - Work closely with domain experts to understand business challenges, formulate problem statements, and translate them into data science solutions. - Evaluate and select appropriate approaches based on problem context, data availability, and performance constraints. - Independently source, clean, and validate data for analysis and modelling, ensuring data quality, consistency, and reliability.		5 days - Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Build, test, and deploy machine learning models with an awareness of model assumptions, limitations, and trade-offs. - Communicate findings and recommendations clearly to both technical and non-technical stakeholders. - Contribute to the design and implementation of robust, scalable pipelines for data processing and model inference. Job Requirement: - Bachelor's, or Master's degree in Data Science, Statistics, Computer Science, Operations Research, Applied Mathematics, Engineering, or a related field. - Only Singaporean or Singapore PR can apply due to project requirement. - Must-haves: Minimum 5 years of relevant industry experience in data science or applied machine learning (or 3+ years with a PhD). - Proven ability to take projects from problem formulation to solution deployment. - Proven ability to work with domain experts and turn ambiguous requirements into structured models. - Hands-on experience in data wrangling, cleaning, and validation. - Strong programming skills in Python and familiarity with relevant data/ML libraries. - Proficiency in a wide range of ML techniques (supervised, unsupervised, classical and modern AI) and understanding of model assumptions, limitations, and trade-offs. - Familiarity with startup environments or fast-paced cross-functional teams. - Experience with sensor data, time series analysis, or signal processing. - Exposure to optimization algorithms, such as genetic algorithms or Bayesian optimization. - Exposure to statistical analysis and statistical modelling techniques. - Exposure to Retrieval-Augmented Generation (RAG) and Agentic AI. - Background working with semiconductor data or in high-tech manufacturing domains. - Ability to work in cross-functional teams and communicate effectively. - Strong problem-solving mindset and attention to detail. - Independent and self-motivated learner who quickly adapts to new domains and technologies.		
12. Senior Software Developer	Job Description: - As a Senior Software Developer (Automation Software Development), you will design, develop, and deploy AI-driven automation solutions for the semiconductor and advanced manufacturing industries. - You will work closely with data scientists and automation engineers to solve complex manufacturing challenges, develop		5 days - Paya Lebar Road

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	scalable software systems, integrate industrial equipment, and ensure reliable deployment of automation applications. Job Requirement: • Bachelor's degree in Computer Science, Software Engineering, Information Technology, or a related field, with at least 3 years of software development experience using Python. • Candidates should possess strong problem-solving skills, experience with software development tools such as Git and Docker, and the ability to work independently as well as collaboratively in a team. • Experience in industrial automation, semiconductor manufacturing, or AI-related technologies will be an advantage.		
13. Technical Sales Engineer Executive	Job Description: • This is a full-time on-site junior executive role for a Technical Sales Engineer located in Singapore. • The Technical Sales Engineer Executive will be responsible for generating sales and providing pre-sales solutioning and design to clients. • Day-to-day tasks include engaging with clients to understand their needs, demonstrating product capabilities, and providing technical solutions that meet customer requirements. • The role will work closely with the Head of Solutions to prepare and deliver presentations, work closely with the sales team to develop strategies, and ensure customer satisfaction through excellent service and support. • Comprehensive training will be provided to candidate to: • Understand company's technologies and competencies • Understand products' broad capabilities and application scenarios • Industry process, technologies, and requirements Job Requirement: • Excellent Communication skills is prioritized • Bachelor's degree or diploma in Engineering, Computer Science, or related field • Technical design and Solutioning skills • Ability to work independently and as part of a team • Strong attention to details and demonstrate curiosity • Sales knowledge and experience is a plus • Technical Sales and Pre-Sales Engineering skills is a plus • 0-2 years' experience in technical sales or 1-2 years' experience in software development • Experience in the AI, manufacturing, or related sectors is a plus • Fresh graduates may apply - on-to-job training provided for both technical and sales requirements		• 5 days • Paya Lebar Road

#7 RED ALPHA CYBERSECURITY PTE LTD

Red Alpha Cybersecurity is a Singapore-based cybersecurity talent development company that identifies, trains, and places the next generation of cybersecurity professionals. Through intensive programmes and

industry-recognised certifications, Red Alpha bridges the cybersecurity talent gap for organisations across the public and private sectors.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
1. AI Engineer	Job Description: - Red Alpha Cybersecurity is hiring AI Engineers who are eager to analyse data, build intelligent systems, and apply AI techniques to real operational challenges through our Digital Specialist Training Programme (DSTP), a structured and fully sponsored pathway. Whether you're starting out or transitioning into tech, Red Alpha guides you through hands-on training in model development, machine learning, and practical AI application, with deployment into meaningful AI or data-focused roles. - Build and fine-tune machine learning models including LLMs, classification, and vision models - Work with foundation models and AI frameworks such as Hugging Face and Ollama - Deploy and serve models using vLLM, Nvidia Triton, NIM, and AWS SageMaker - Design and query databases using SQL, PostgreSQL, and MongoDB - Perform 1D and 2D data analysis to derive actionable insights - Manage cloud infrastructure on AWS and containerised environments - Apply responsible AI practices and optimise models for production environments - Monitor, integrate, and maintain AI systems across enterprise deployments Job Requirement: - Singapore Citizen or Permanent Resident - No prior experience or degree required - Strong aptitude and passion for the relevant field - Logical and analytical thinking ability - Full-time availability (9am–6pm, Mon–Fri)		5 days - Client-based deployment
2. AI Forward Deployment Engineer	Job Description: - Red Alpha Cybersecurity is hiring AI Engineers who are eager to analyse data, build intelligent systems, and apply AI techniques to real operational challenges through our Digital Specialist Training Programme (DSTP), a structured and fully sponsored pathway. Whether you're starting out or transitioning into tech, Red Alpha guides you through hands-on training in model development, machine learning, and practical AI application, with deployment into meaningful AI or data-focused roles. - Build and fine-tune machine learning models including LLMs, classification, and vision models - Work with foundation models and AI frameworks such as Hugging Face and Ollama - Deploy and serve models using vLLM, Nvidia Triton, NIM, and AWS SageMaker		5 days - Client-based deployment

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Design and query databases using SQL, PostgreSQL, and MongoDB - Perform 1D and 2D data analysis to derive actionable insights - Manage cloud infrastructure on AWS and containerised environments - Apply responsible AI practices and optimise models for production environments - Monitor, integrate, and maintain AI systems across enterprise deployments		
	Job Requirement: - Singapore Citizen or Permanent Resident - No prior experience or degree required - Strong aptitude and passion for the relevant field - Logical and analytical thinking ability - Full-time availability (9am–6pm, Mon–Fri)		
3. Cloud Engineer	Job Description: - Red Alpha Cybersecurity is hiring Cloud DevOps Engineers who are eager to architect, deploy, and manage cloud environments through our Digital Specialist Training Programme (DSTP), a structured and fully sponsored pathway. Whether you're new to the field or making a career switch, Red Alpha provides hands-on training with cloud platforms, automation, and infrastructure fundamentals, with deployment into meaningful cloud or infrastructure roles. - Design and deploy cloud infrastructure on AWS and Azure - Implement CI/CD pipelines and GitOps workflows using FluxCD - Build and manage containerised environments using Docker and Kubernetes - Write automation scripts in Python and Bash - Provision and manage infrastructure as code using Terraform, CloudFormation, and Ansible - Manage project workflows using Jira, Confluence, and Agile planning tools - Implement DevSecOps practices and security management across cloud environments - Monitor and maintain system observability using the Elastic Stack		5 days - Client-based deployment
4. Cybersecurity Engineer	Job Description: Red Alpha Cybersecurity is hiring Cybersecurity Specialists who are eager to launch their career in cybersecurity through our Alpha Specialist Training Programme (ASTP), a structured and fully sponsored pathway. Whether you're a fresh graduate or making a career switch, Red Alpha equips you with practical skills, industry-recognised certifications, and deployment into meaningful cybersecurity roles.		5 days - Client-based deployment

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Undergo hands-on training in cyber defence, incident response, threat intelligence, and offensive security - Work across both public and private sector cybersecurity roles upon deployment - Apply skills in penetration testing, threat hunting, security operations, and incident response - Support security engineering, GRC, and SOC functions depending on placement - Collaborate with teams on security architecture and red team operations - Conduct vulnerability assessments and digital forensics investigations - Perform malware analysis and reverse engineering - Develop and present strategic security reports to stakeholders Job Requirement: - Singapore Citizen or Permanent Resident - No prior experience or degree required - Strong aptitude and passion for the relevant field - Logical and analytical thinking ability - Full-time availability (9am–6pm, Mon–Fri)		
5. Digital Talent Program Specialist (1 Year Contract)	Job Description: - We are seeking a motivated and people-oriented Digital Talent Programme Executive to support the successful delivery of our digital talent development programmes. This role will be responsible for managing trainee engagement, programme operations, employer coordination, and employment outcomes throughout the trainee lifecycle. - The ideal candidate is highly organized, enjoys working with people, and has a strong interest in technology, digital skills development, workforce transformation, and talent management. Key Responsibilities Programme Management & Operations: - Coordinate and administer digital talent programmes from onboarding to graduation. - Manage trainee records, attendance, assessments, certifications, and programme documentation. - Ensure programme milestones, timelines, and reporting requirements are met. - Support programme scheduling, logistics, and stakeholder communications. Trainee Success & Engagement: - Serve as the primary point of contact for trainees throughout their learning journey. - Conduct regular check-ins to monitor trainee progress, engagement, and well-being. - Provide guidance on professional development, employability skills, and workplace readiness. - Organize networking sessions, industry talks, workshops, and community engagement activities. Employer & Industry Engagement:		5 days - Client-based deployment

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Coordinate interviews, networking events, career fairs, and employer engagement activities. • Support the matching of trainees to suitable internship or employment opportunities. • Maintain relationships with hiring managers, recruiters, and industry partners. • Gather employer feedback to improve programme outcomes and trainee readiness. • Career Development Support: • Assist trainees with resume preparation, LinkedIn optimization, interview preparation, and job search strategies. • Monitor placement progress and maintain employment outcome records. • Track and report key programme KPIs, including completion rates, certifications, and placement outcomes. • Reporting & Administration: • Prepare programme reports, dashboards, and updates for internal and external stakeholders. • Maintain accurate records within CRM, ATS, or programme management systems. • Support compliance, funding, and audit requirements where applicable. Job Requirement: • Diploma or Bachelor's Degree in Human Resources, Business, Communications, Education, Information Technology, or a related field. • Experience • 1–3 years of experience in programme coordination, talent development, recruitment, training administration, education, workforce development, or customer success. • Fresh graduates with strong internship experience may be considered. • Skills & Competencies: • Excellent communication and stakeholder management skills. • Strong organizational and project coordination abilities. • Ability to manage multiple priorities in a fast-paced environment. • Comfortable engaging trainees, employers, and training partners. • Proficient in Microsoft Office (Excel, PowerPoint, Word). • Experience with CRM, ATS, LMS, or programme management platforms is advantageous. • Interest in technology, cybersecurity, AI, digital transformation, or workforce development is a plus. • Preferred Attributes: • Passionate about helping individuals build meaningful careers. • Customer-focused with strong interpersonal skills. • Resourceful, proactive, and adaptable. • Able to work independently while collaborating effectively with cross-functional teams. • Contract Duration: 12 Months		

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	Possibility of conversion to a permanent role based on performance and business needs.		
6. Network Engineer	Job Description: - Red Alpha Cybersecurity is hiring Full Stack Infra Engineer who are eager to design, implement, and maintain robust and secure infrastructure across LAN, WAN, and cloud environments. You'll be involved in both project-based work and the daily operations of mission-critical systems, with opportunities to grow into advanced roles across networking, infrastructure, and cybersecurity. - Design, implement, and maintain LAN, WAN, WLAN, VPN, and firewall systems - Configure and deploy network appliances, routers, switches, and load balancers (e.g. Cisco, Fortinet) - Conduct vulnerability assessments and support remediation across network layers - Troubleshoot network performance issues and ensure minimal downtime - Work closely with clients and teams to generate system specs and present architecture solutions - Plan, execute, and monitor IT infrastructure setup and upgrades (on-prem and virtualised) - Manage and maintain Windows, Unix/Linux servers, virtual machines, and databases (e.g. SQL Server, Oracle) - Perform routine preventive maintenance and respond promptly to system alerts and issues - Support operational systems to meet SLA requirements - Participate in change management, disaster recovery, and patch management processes Job Requirement: - Singapore Citizen or Permanent Resident - No prior experience or degree required - Strong aptitude and passion for the relevant field - Logical and analytical thinking ability - Full-time availability (9am–6pm, Mon–Fri)		5 days - Client-based deployment
7. Software Engineer	Job Description: - Red Alpha Cybersecurity is hiring Software Engineers who are eager to design, build, and test applications through our Digital Specialist Training Programme (DSTP), a structured and fully sponsored pathway. Whether you're a fresh graduate or making a career switch, Red Alpha equips you with practical coding experience, engineering best practices, and industry-relevant skills, with deployment into software development roles. - Develop applications using Java and C++ fundamentals - Build frontend interfaces using HTML, CSS, JavaScript, and React.js - Develop backend services using Python and Node.js - Write shell scripts and work within Linux environments - Containerise and deploy applications using Docker		5 days - Client-based deployment

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Apply secure programming practices across the software development lifecycle • Leverage AI tools to enhance software development workflows • Collaborate with teams on real-world software engineering projects		
	Job Requirement: • Singapore Citizen or Permanent Resident • No prior experience or degree required • Strong aptitude and passion for the relevant field • Logical and analytical thinking ability • Full-time availability (9am–6pm, Mon–Fri)		
8. Systems Engineer	Job Description: • Red Alpha Cybersecurity is hiring Full Stack Infra Engineer who are eager to design, implement, and maintain robust and secure infrastructure across LAN, WAN, and cloud environments. You'll be involved in both project-based work and the daily operations of mission-critical systems, with opportunities to grow into advanced roles across networking, infrastructure, and cybersecurity. • Design, implement, and maintain LAN, WAN, WLAN, VPN, and firewall systems • Configure and deploy network appliances, routers, switches, and load balancers (e.g. Cisco, Fortinet) • Conduct vulnerability assessments and support remediation across network layers • Troubleshoot network performance issues and ensure minimal downtime • Work closely with clients and teams to generate system specs and present architecture solutions • Plan, execute, and monitor IT infrastructure setup and upgrades (on-prem and virtualised) • Manage and maintain Windows, Unix/Linux servers, virtual machines, and databases (e.g. SQL Server, Oracle) • Perform routine preventive maintenance and respond promptly to system alerts and issues • Support operational systems to meet SLA requirements • Participate in change management, disaster recovery, and patch management processes		• 5 days • Client-based deployment
	Job Requirement: • Singapore Citizen or Permanent Resident • No prior experience or degree required • Strong aptitude and passion for the relevant field • Logical and analytical thinking ability • Full-time availability (9am–6pm, Mon–Fri)		

#8 TOPPAN ECQUARIA PTE LTD

As a Singapore-based digital transformation company, TOPPAN Ecquaria was founded in 1998, specialising in the design and delivery of large-scale, mission-critical systems for governments and enterprises. However, we don't just build software. We engineer technology ecosystems that endure.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
1. AI Engineer	Job Description: - Contribute to the design and implementation of AI solutions. - Assist in the development and implementation of AI models and systems, leveraging techniques such as Language Models (LLMs) and generative AI. - Collaborate with stakeholders to identify business opportunities and define AI project goals. - Stay updated with the latest advancements in generative AI techniques, such as LLMs, and evaluate their potential applications in solving enterprise challenges. - Utilize generative AI techniques, such as LLMs, to develop innovative solutions for enterprise industry use cases. - Integrate with relevant APIs and libraries, such as Azure Open AI GPT models and Hugging Face Transformers, to leverage pre-trained models and enhance generative AI capabilities. - Implement and optimize end-to-end pipelines for generative AI projects, ensuring seamless data processing and model deployment. - Utilize vector databases, such as Redis, and NoSQL databases to efficiently handle large-scale generative AI datasets and outputs. - Implement similarity search algorithms and techniques to enable efficient and accurate retrieval of relevant information from generative AI outputs. - Collaborate with domain experts, stakeholders, and clients to understand specific business requirements and tailor generative AI solutions accordingly. - Conduct research and evaluation of advanced AI techniques, including transfer learning, domain adaptation, and model compression, to enhance performance and efficiency. - Establish evaluation metrics and methodologies to assess the quality, coherence, and relevance of generative AI outputs for enterprise industry use cases.		5 days 9am to 6pm - Toa Payoh
	Job Requirement: - Bachelor's Degree in Computer Science, Engineering, Data Science, or any other relevant subject. - Minimum 2 years of experience in Data Science and Machine Learning. - Deploying LLMs, AI Agents and AI Solutions, integrate and deploy open-source AI models and solutions from Hugging face repository. - In-depth knowledge of machine learning, deep learning, and generative AI techniques.		

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Proficiency in programming languages such as Python, R, and frameworks like TensorFlow, PyTorch, Flask, Langchain, Llamaindex, CrewAI and Autogen. - Strong understanding of NLP techniques and frameworks such as BERT, GPT, or Transformer models. - Familiarity with computer vision techniques for image recognition, object detection, or image generation. - Experience with cloud platforms such as Azure, AWS, or GCP and deploying AI solutions in a cloud environment. - Expertise in data engineering, including data curation, cleaning, and preprocessing. - Knowledge of trusted AI practices, ensuring fairness, transparency, and accountability in AI models and systems. - Excellent problem-solving and analytical skills, with the ability to translate business requirements into technical solutions. - Track record of driving innovation and staying updated with the latest AI research and advancements.		
2. Data Engineer	Job Description: - Design and implement robust, scalable data pipelines and architectures to support data ingestion, processing, and storage. Including performance optimizations for data modelling and ingestion. - Develop and optimize complex SQL queries and stored procedures for data extraction, transformation, and analysis. - Model data to meet different use cases. - Utilize programming languages (e.g., Python, R, Java, Scala) to build data processing applications and automate data workflows. - Collaborate with data scientists and analysts to understand data requirements and deliver high-quality data solutions. - Lead the integration of data from various sources into data lakes and warehouses, ensuring data quality and consistency. - Monitor and troubleshoot data pipelines and workflows to ensure optimal performance and reliability. - Communicate with and support data users. - Document data processes, data models, and architectural designs to ensure knowledge sharing and compliance with best practices.		5 days 9am to 6pm - Toa Payoh
	Job Requirement: - Minimum 3 years in data engineering fields with system integration, and at least 1 year in system integration and implementation in cloud/web-based environments. - Demonstrated experience in providing effective, working solutions and implementations, particularly in cloud-based environments. - Solid understanding of ETL processes, data warehousing concepts, and data modeling best practices. - Proficiency in Databricks, Azure Data Lake, PowerBI, Tableau and related data processing and visualisation software. - Familiarity with Windows, Linux, AWS and/or Azure platforms.		

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Strong programming skills in languages such as Python and R is a must. - Proficiency in other programming languages such as Java, Scala and C# will be advantages. - Experience in data processing frameworks (e.g., Apache Spark, Apache Flink). - Experience with large-data management system with visualisation tools. - Experience with Data Integration and ETL Pipelines, Data Warehousing and BI reporting projects. - Experience with Singapore Government Project will be advantageous. - Excellent problem-solving skills and the ability to work independently and collaboratively in a fast-paced environment.		
3. DevSecOps Engineer	Job Description: - Design, implement, and manage secure and scalable infrastructure on both cloud platforms (AWS/Azure) and on-premises virtualization environments (Hyper-V, ESXi, Proxmox VE, etc.). - Experience on implementation with Infrastructure as Code (IaC) tools, especially Terraform. - Set up and maintain middleware such as NGINX and ATS. - Implement observability (o11y) stacks such as Grafana Stack. - Deploy and manage Kubernetes clusters including k3s, k0s, and managed services like AWS EKS. - Provision and manage databases including AWS RDS, PostgreSQL, MySQL, Oracle, and Microsoft SQL Server. - Administer and secure on-premises server infrastructure, including hypervisor management, patching, and performance tuning. - Collaborate with development and operations teams to troubleshoot and resolve infrastructure and security-related issues. - Monitor systems for security threats, respond to incidents, and conduct postmortem analysis. - Manage and enforce access control policies across various systems and platforms. - Champion and integrate security best practices ("shifting left") into the software development lifecycle, from code to deployment. - Develop, maintain, and optimize our CI/CD pipelines, with a primary focus on GitLab CI, to ensure rapid, reliable, and secure software delivery. - Automate security testing, vulnerability scanning, and compliance checks within the deployment process. - Stay current with emerging security threats, technologies, and industry best practices. Job Requirement: - Proven experience as a DevOps, Site Reliability, or Systems Engineer with a strong focus on security.		5 days 9am to 6pm - Toa Payoh

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Hands-on experience managing cloud environments in either AWS or Azure (e.g., IAM, VPC, Security Groups, EC2, S3, Azure AD, NSGs). - Solid experience in on-premises server administration and virtualization using platforms like Hyper-V, VMware ESXi, or Proxmox VE. - Demonstrable experience with CI/CD concepts and tools, particularly GitLab CI. - Familiarity with security tools for static/dynamic analysis (SAST/DAST), container scanning, and dependency checking. - Strong understanding of networking principles, firewalls, and secure network design. - A background in software development, particularly with Java, is a significant plus. - Knowledge of containerization and orchestration technologies (Docker, Kubernetes). - Experience with scripting languages (e.g., Python, Bash, PowerShell) for automation. - Cloud certifications (e.g., AWS Certified Solutions Architect, Azure Administrator Associate).		
4. DevSecOps Engineer (Contract)	Job Description: - Design, build, and maintain cloud infrastructure and networking components across Azure and AWS environments. - Manage and enhance our central CI/CD tooling ecosystem (e.g., GitLab, Nexus, Nexus-iq, SonarQube, etc.) to support product teams across the organization. - Implement automation for provisioning, configuration, and deployment using tools such as Terraform, Ansible, or similar. - Monitor, secure, and optimize CI/CD pipelines and cloud infrastructure for performance, reliability, and cost efficiency. - Collaborate with security, networking, and application teams to ensure seamless integration and compliance with organizational policies. - Troubleshoot and resolve complex networking and infrastructure issues impacting the CI/CD platform. - Contribute to best practices and internal standards, helping to evolve the platform with scalability and maintainability in mind. - Contribute to the success of our Northstar / DP Programme. - Mentor junior engineers and provide technical guidance to other DevOps and development teams. Job Requirement: 4–8 years of experience in DevOps, Cloud Infrastructure, or Platform Engineering roles. - Strong proficiency with Azure and/or AWS including compute, storage, networking (VPCs, subnets, VPN, routing, firewalls, DNS). - Hands-on experience with infrastructure as code (IaC) tools such as Terraform or CloudFormation.		5 days 9am to 6pm - Toa Payoh

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Good understanding of CI/CD pipelines and toolchains • Experience with at least one enterprise-grade platform (e.g., GitLab, Jenkins, Azure DevOps). • Solid foundation in Linux administration, containerization (Docker, Kubernetes), and network troubleshooting. • Familiar with monitoring, logging, and alerting tools (e.g., Prometheus, Grafana, ELK, CloudWatch). • Scripting or programming skills (Python, Bash, PowerShell, or Go). • Good to have skills. • Experience managing multi-cloud or hybrid environments. • Familiarity with Vault, SonarQube, Nexus, or similar developer platform tools. • Exposure to OIDC, SSO, and identity management in CI/CD or cloud contexts. • Understanding of DevSecOps practices, compliance, and governance in CI/CD pipelines.		
5. Project Manager	Job Description: • Manage the development and implementation of TOPPAN Ecquaria's solutions and applications. • Manage and lead a team of business analysts and developers in the entire project development life cycle. • Manage each phase of the development life cycle and ensure that all tasks/objectives in each phase are met. • Manage the expectations of Stakeholders and Clients. • Coordinate with suppliers and internal departments. • Accountable for the scope, schedule and resources used. • Manage and oversee the profit and loss of the project. Job Requirement: • Computer Science background or equivalent. • At least 3 years' experience in project management and 5 years' experience in IT with good problem analysis techniques (those with less experience may be considered for a junior position). • Strong written and communication skills. • Strong inter-personal relationship. • CITPM or PMP – Certified will be a huge added advantage. • Good understanding of Cloud Computing and Java / .NET / Web technologies will be an advantage.		• 5 days • 9am to 6pm • Toa Payoh
6. Sales Manager	Job Description: • Identify, develop and manage accounts to achieve sales targets. • Lead, strategise and drive the sales bid process to secure new business deals. • Promote the company's consultancy, solutions and software. • Work with a team of pre-sales consultants to prepare tender proposals and presentations. Job Requirement: • Degree or Diploma in Computer Science, Marketing or Business.		• 5 days • 9am to 6pm • Toa Payoh

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Minimum 3 years of sales experience in a corporate function, experience in handling government accounts will have an added advantage. - Sales experience in handling government accounts will have added advantage. - Excellent presentation, communication and interpersonal skills.		
7. Software Engineer	Job Description: - Embrace DevSecOps culture and practices for application development. - To be part of a cross-functional teams that would be responsible for the end-to end delivery of IT services, that adopt a you-code-it, you-run-it approach to software product development and maintenance. - Work with fellow developers, your Technical Lead, Product Owner and ScrumMaster in iteratively delivering IT solutions for both internal and external stakeholders. - To be exposed to different aspects of software delivery, including solution design, CI/CD pipeline configurations, frontend and backend development, and test automation. - Adaptability and thrives in dealing with uncertainties. - To articulate software problems and proposed solutions clearly. - Thrives in working as a team and embraces a team-first mentality. - Takes initiative, pride and ownership in work and possess a Growth mindset.		5 days 9am to 6pm - Toa Payoh
	Job Requirement: 3+ years frontend and/or backend software engineering experience in building scalable products, with a demonstrated ability in designing and building well-structured enterprise applications on commercial cloud: - Adept skillsets in modern web application technology stack, such as React.js, Spring, FastAPI, Django, PostgreSQL. - Experience in development and deployment on commercial cloud such as Amazon Web Services (AWS), Google Cloud Platform (GCP) and Microsoft Azure. - Experience in containerisation technologies, such as Docker and Kubernetes. - Exposure to infrastructure provision tools, such as Terraform and Ansible. - Knowledge on the concept of DevSecOps and CI/CD, with experience in relevant CI technologies such as Git, Jenkins, and Bamboo. - Understanding of the concept of Secure-By-Design Lifecycle for Agile and the utilisation of technologies for SAST and DAST. - Practised Test-Driven Development with the utilisation of automated testing.		
8. Solution Architect	Job Description: Determine and confirm client business expectations and needs.		5 days 9am to 6pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Understand the client's requirements and design the infrastructure and system architecture to support the cloud native solution. - Convert system requirements into software architecture and design documentation, and ensuring the completeness of the proposed architecture. - Work with Project Manager and customers to manage/negotiate resources, scope and schedule. - Interface and coordinate tasks with Module Leaders to ensure all modules within the system are progressing as planned, and modules can be integrated smoothly. - Lead the development team to develop and implement the proposed cloud native application. - Mentor for junior technical staff.		Toa Payoh
	Job Requirement: - Diploma / Degree in Computer Science / Computer Engineering / Information Technology related field, or IT equivalent. - Experienced in designing and delivering complex web-based applications using Python, C#, Java, HTML/Javascript, ReactJS or other relevant technology stack. - Experienced in one or more of the following database servers: Oracle, DB2, MSSQL, MySQL. - Knowledge of open-source frameworks such as Spring, Hibernate. - MVC design, Data modeling, Deployment & Build management, Data migration. - Possess working experience in Cloud Native Architecture with Microservices, - Docker, Docker Swarm / Kubernetes, CI / CD, Domain Driven Design (DDD), API Design. - Offshore Development experience is a plus, though not compulsory. - Ability to converse in Mandarin will be an added advantage as the incumbent will be required to liaise with our Mandarin-speaking associates based in China (Suzhou). - Candidates who are willing to travel will be considered for overseas assignments.		
9. System Analyst	Job Description: - Assist in gathering requirements from stakeholders and analyze the potential impact on related business applications. - Code, modify, test, correct, and document both new and existing programs using assigned languages, tools, and coding conventions. - Prepare and document test data, set up testing and production environments, and conduct unit, module, functional, and volume testing. - Analyze all test results and take necessary corrective actions. - Prepare and maintain comprehensive program and system documentation while producing deliverables according to group standards.		5 days 9am to 6pm - Toa Payoh

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	- Assist in establishing file structures and processing logic requirements. - Assist Project Leaders in the study and design of application systems, work coordination, project management, and user training. - Troubleshoot and support end-users during the implementation and maintenance of application systems. - Train other developers in relevant technical skills. - Participate in Disaster Recovery activities, including simulation exercises at Disaster Recovery sites. - Learn and pick up new programming skills related to system development as assigned by supervisors.		
	Job Requirement: - Three (3) years of experience (within the past four years) in each of the following: - JSP, Servlet, and Java Bean, JavaScript and Session management, JDBC and SQL. - Two (2) years of experience (within the past three years) in coding using: HTML 5, XHTML, AJAX, and JSON, Java Server Faces, EJB, including session, entity & message, Service Locator, Business Delegate, Data Transfer Object (DTO), and Data Access Object (DAO). - Hands-on experience with Eclipse, or equivalent tools. Experience in Portal and Portlet development and n-Tier Architecture. - Knowledge of Java Web Security/LDAP, JEE Security, JEE Transaction, and JNDI. - Proficiency in XML, Web Services (SOAP), and AngularJS development. - Ability to work with UML diagrams. - Expertise in preventing application vulnerabilities, such as Cross site scripting, Injection flows (SQL/Command), Race conditions, and improper error/exception handling. - Experience with application integration for government services such as Corppass and Singpass.		

#9 TRIDENT DIGITAL TECH PTE LTD
