<b>Assistant Manager/ Senior Executive, Imaging Informatics (Radiology)</b>	<p>Degree in Health Informatics, Information Technology, Radiography or a related field</p> <p>Experience with imaging informatics systems (e.g., RIS and PACS,) and strong understanding of imaging standards such as DICOM and HL7 will be an added advantage</p> <p>Excellent problem-solving, communication, and teamwork skills</p> <p>Ability to work on-call shifts, including after-hours and weekends, as part of a rotation schedule.</p>	<p>You will be involved in the management, optimization, and support of imaging informatics systems to ensure seamless workflows and enhanced patient care. You will also serve as a key resource for first-level on-call support, ensuring timely resolution of critical issues. Your job duties include:</p> <ul style="list-style-type: none"> <li>- Oversee the implementation, integration, and maintenance of imaging informatics systems, including RIS, PACS, and EMR.</li> <li>- Support the development and utilization of AI solutions in medical imaging for improved efficiency and diagnostic accuracy</li> <li>- Serve as the first point of contact for imaging-related system issues, providing on-call support to address and resolve urgent problems</li> <li>- Collaborate with radiologists, clinicians, and IT teams to ensure efficient data flow and image accessibility</li> <li>- Develop and deliver training programs for end-users to maximize system utilization</li> <li>- Monitor system performance, troubleshoot issues, and implement improvements</li> <li>- Document and escalate unresolved issues to second-level support or vendors when necessary</li> <li>- Ensure compliance with regulatory standards and data security protocols</li> <li>- Participate in system upgrades, testing, and validation to maintain optimal performance.</li> </ul>	<p>Mondays - Thursdays (8.30am to 6pm), Friday (8.30am to 5.30pm)</p>
<b>Assistant Manager/ Senior Executive, Orthopaedic Diagnostic Centre</b>	<p>Degree in Health Sciences related fields</p> <p>Experience in clinical research will be an advantage</p> <p>Proficient in MS Access/ SPSS</p> <p>Strong analytical skills</p> <p>Good communication skills</p>	<p>You will strive to achieve all pre and post operation assessments of patients in the Orthopedic Diagnostic Centre.</p> <p>Your job duties include:</p> <ul style="list-style-type: none"> <li>- Perform clinical outcome assessment of patients through surveys</li> <li>- Perform data analysis and report writing for submission to conferences and journals for publications</li> <li>- Participate in research studies meetings</li> <li>- Provide administrative support in the centre</li> </ul>	<p>Mondays - Thursdays (8.30am to 6pm), Friday (8.30am to 5.30pm)</p> <p>One Sat every 3 weeks (9.30am to 12.30pm)</p>

## #21 SMRT Corporation (15 Aug only)

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
<b>Executive Engineer, Rolling Stock</b>	Minimum Degree in Electrical / Mechanical / Electronic Engineering or equivalent.	<p>The executive engineer will be responsible for the reliability, maintainability, availability and safety of the trains. The desired outcome is to support SMRT TEL in delivering safe and reliable train services for the commuters. As part of the job scope, you will be handling engineering issues related to train-borne systems of the trains serving Thomson-East Coast Line (TEL).</p> <p>To handle the complex engineering issues, the executive engineer will work in cross-functional teams within SMRT and interact with staff from the various disciplines. In the course of your work, you will also engage Land Transport Authority (LTA) and OEM on a variety of engineering related issues.</p> <p>Responsibilities include:</p> <ol style="list-style-type: none"> <li>1. Carry out train reliability and defect trend analysis, fault troubleshooting and investigation, engineering evaluation and implementation of engineering programs.</li> <li>2. Review preventive and corrective maintenance performed by SMRT TEL's Rolling Stock Staff. Participate in Daily Production Meeting.</li> <li>3. Responsible for tracking SMRT TEL's Rolling Stock Key Performance Index (KPI) and prepare management report.</li> <li>4. Review and update SMRT TEL's Rolling Stock (RS) Documents, which include Work Instructions, Quality Procedures, Standard Operating Procedures, Risk Assessments.</li> <li>5. Utilise Maintenance Management System(MMS) system for compiling asset/system performance trends and analysis, and perform MMS training to engineers and maintenance personnels.</li> <li>6. Promote Kaizen and Safety Culture Within SMRT TEL's Rolling Stock (RS) Department. Work with the maintenance teams on Kaizen projects to continuously improve work processes for enhanced Safety, Productivity and Services.</li> <li>7. Perform miscellaneous engineering and administrative job-related duties as assigned.</li> </ol>	9am to 6pm
<b>Executive Engineer, Engineering Performance and Support</b>	Degree in Engineering discipline. Experience with database management (SQL Server) and analytical tools (Power BI, Qlik).	<p>The executive engineer is responsible for overall administrator and management of Maintenance Management System (MMS) and improving the effectiveness and efficiency of maintenance activities of Maintenance and Engineering (M&amp;E) Group. The core focus of the job will be ensuring proper configuration and maintenance for MMS and analyzing maintenance performance data, implementing process improvements, and supporting asset reliability efforts.</p> <p>Responsibilities include:</p> <ol style="list-style-type: none"> <li>1. Maintain user roles, data quality and system's</li> </ol>	9am to 6pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
		<p>performance</p> <p>2. Provide user support and ensure system performance monitoring and troubleshoot Maximo-related issues.</p> <p>3. Perform routine maintenance on MMS.</p> <p>4. Develop custom reports and dashboards to track and report on the effectiveness of maintenance interventions and the resulting improvements in asset performance.</p> <p>5. Facilitate audits conducted by internal auditors, the authority, and other external agencies.</p> <p>6. Facilitate and coordinate external projects with LTA and/or external parties.</p> <p>7. May be required to perform work during night hours and over weekends/public holidays.</p>	
<b>Executive Engineer, Rolling Stock Engineering</b>	<p>Degree in Electrical / Electronic Engineering or equivalent from a recognised institution.</p> <p>Experience in the railway industry, especially in rolling stock/ depot equipment, would be advantageous.</p>	<p>The Electrical Engineer in Rolling Stock Engineering shall be responsible for providing technical support and advisory services to other stakeholders such as Operations, Maintenance, Project. The engineer will need to carry out defect investigation, evaluate design modifications and review changes to maintenance regime. The engineer will also be tasked to manage and/or support execution of rolling stock/ depot equipment related projects through the project lifecycle.</p> <p><b>Responsibilities</b></p> <p>1. Comply with all safety requirements.</p> <p>2. Provide engineering support and inputs to rolling stock/ depot equipment related projects, with a focus on electrical subsystems.</p> <p>3. Conduct engineering study, technical trending and failure analysis on rolling stock/depot equipment and related equipment.</p> <p>4. Manage the execution of rolling stock/ depot equipment related projects. Tasks include preparation of technical specifications and tender documents, tender evaluation, and design review of contractors' submissions.</p> <p>5. Develop, manage and implement improvement solutions for rolling stock/ depot equipment.</p> <p>6. Review Work Instructions and Risk Assessments to ensure relevance and adequacy.</p> <p>7. Provide technical and engineering services to maintenance branches to continuously improve maintenance of rolling stock/depot equipment.</p> <p>8. Perform other administrative and planning duties as assigned by supervisor/management.</p>	8.15am to 5.45pm
<b>Executive Engineer, Engineering Governance Branch</b>	<p>Degree in Mechanical / Electrical / Electronics Engineering or equivalent from a</p>	<p>The Executive Engineer / Senior Engineer in the Engineering Governance Branch shall be responsible to support the governance role for the SMRT Engineering Governance Processes including asset modification, changes in maintenance regime and risk acceptance. He/she shall be required to have good understanding of the governance processes and provide support to</p>	8.15am to 5.45pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
	recognised institution. Previous Railway System or risk governance experience would be advantageous.	<p>internal and external stakeholders. This shall include ensuring compliance to the governance processes, review of submissions and coordination of the respective approval forum to ensure appropriate risk identification, evaluation and acceptance for operations activities.</p> <p><b>Responsibilities</b></p> <ol style="list-style-type: none"> <li>1. Work in any SMRT Maintenance Depot or facility and comply with all Safety Requirements.</li> <li>2. Work in rotating or fixed shifts (in accordance with MOM guidelines).</li> <li>3. Develop in-depth understanding of the governance processes and provide support in form of response to queries and clarifications to internal and external stakeholder from LTA and SMRT.</li> <li>4. Ensure compliance to the governance process flow for asset modifications, changes in maintenance regime and risk acceptance. This shall include ensuring adequate and accurate submissions from applicants, review of submissions, solicit inputs from respective ops, maintenance, engineering and system management departments.</li> <li>5. Perform the role of secretarial for the respective engineering governance approval forum and including planning, scheduling, coordination and minutes-taking for forum.</li> <li>6. Perform documentation follow up and archival to ensure full closure of the engineering governance process.</li> <li>7. Liaise with LTA to provide status tracking, update and ensure compliance to the requirement of the authority.</li> <li>8. Develop and implement process improvement initiatives to ensure continuous improvement and improve robustness of the engineering governance process.</li> <li>9. Perform other tasks as assigned by supervisor.</li> </ol>	
<b>Executive Engineer, Civil, Architecture &amp; Pway Engineering</b>	Degree in Mechanical / Mechatronics / Electrical / Electronics / Civil & Structural Engineering or equivalent from a recognised institution Previous Railway System experience	The EE/SE is to enhance the safety and reliability of the railway infrastructure system by leading workflow effectiveness and efficiency improvement of its inspection, maintenance, and other supplementary activities. Subject to deployment, the scope can include the track, third rail, point, viaduct, tunnel, station and/or depot infrastructure assets. The EE/SE is required to conduct defect troubleshooting, failure analysis, reliability trending, engineering studies, maintenance/renewal planning, asset management planning, supply chain management planning, and/or develop solutions to problem statements identified. The EE / SE provides technical advice to team members as well as resolve complex issues pertaining to the railway infrastructure and/or frontline engineering train faults. The EE / SE is also involved in the engagement and management of contractors and stakeholders in ensuring	8.15am to 5.45pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
	would be advantageous.	<p>the achievement of operating standards and quality standards. The EE / SE may conduct training, assessment and develop training material in his/her area of expertise as required. Subject to business needs, professional development, and/or succession planning, the EE/SE may be rotated within or across divisions.</p> <p><b>Responsibilities</b></p> <ol style="list-style-type: none"> <li>1. Work in any SMRT depots, tracks or facilities.</li> <li>2. Work in rotating or fixed shifts (i.a.w. MOM guidelines).</li> <li>3. Support the division's efforts to achieve daily, short-term, and long-term objectives and Key Performance Indicators (KPIs)</li> <li>4. Responsible to ensure the timely completion of all duties and/or projects, as assigned.</li> <li>5. Work effectively with Ops and Maintenance staff from the Lines as well as other engineering and projects departments to ensure safe, reliable, and efficient daily operations.</li> <li>6. Identify safety and reliability concerns of the railway infrastructure system and develop solutions to overcome them.</li> <li>7. Draft technical work instructions for preventive and corrective maintenance activities and/or quality procedures.</li> <li>8. Identify, propose, and implement cost effective technologies, and/or changes to process and/or maintenance regime to enhance railway infrastructure system performance.</li> <li>9. Support LTA and SMRT projects in reviewing project design specifications and ensure their adequacy for the safety, reliability, maintainability, and operability. To provide other support to the projects, as required.</li> <li>10. Assist in planning of annual budget and workplan for his/her unit.</li> <li>11. Identify and report any safety concerns at the workplace.</li> <li>12. Undertake any other tasks or functions that are supplementary to the performance of the works, as assigned by supervisor. (Training and qualifications will be provided by company, as required). Examples include (but not limited to): <ol style="list-style-type: none"> <li>a. Perform admin functions</li> <li>b. Respond to emergency operations</li> <li>c. Support the execution of projects; including verifying contractor's work completion, providing manpower to support project testing &amp; commissioning, attendance to contractors, etc</li> <li>d. Preparation of reports</li> </ol> </li> </ol>	

**#22 Sun City Maintenance (15 Aug only)**

<b>Job Positions</b>	<b>Pre-requisites</b>	<b>Key Responsibilities</b>	<b>Working Hours</b>
<b>Operations Executive</b>	Relevant diploma/degree leadership experience	1) Educate, uphold and guard company core values and culture across all job sites 2) Building open and trusting relationship with clients 3) Manage staff motivation, discipline, development and performance 4) Monitor and uphold the cleaning and maintenance quality standards and operating procedures for all job-sites 5) Ensure effective OJT and upskilling of all operational staff 6) Oversee the profitability and cost effectiveness of assigned job sites 7) Plan manpower deployment at various site to meet the contractual requirement of clients 8) Resolve feedback/complaints from clients and taking immediate preventive measures to ensure that similar problem does not recur 9) Recruit and induct new employees 10) Ensure all WSH and Safety Compliance Committee requirements are met	44hrs
<b>Operations Manager</b>	Relevant diploma/degree leadership experience	1) Educate, uphold and guard company core values and culture across all job sites 2) Building open and trusting relationship with clients 3) Manage staff motivation, discipline, development and performance 4) Monitor and uphold the cleaning and maintenance quality standards and operating procedures for all job-sites 5) Ensure effective OJT and upskilling of all operational staff 6) Oversee the profitability and cost effectiveness of assigned job sites 7) Plan manpower deployment at various site to meet the contractual requirement of clients 8) Resolve feedback/complaints from clients and taking immediate preventive measures to ensure that similar problem does not recur 9) Recruit and induct new employees 10) Ensure all WSH and Safety Compliance Committee requirements are met	44hrs

**#23 Tiger Brokers (15 & 16 Aug)**

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
<b>Investment Representative (IR)</b>	<p>"Recognised university degree in any discipline, preferably in Economics or Finance</p> <p>Experience in a related industry will be an advantage</p> <p>Completion of relevant CMFAS exams (Modules 1A, 2A, 5, 6 and 6A).</p> <p>Interested candidates will be enrolled in our Tiger L.E.A.P Programme, a 6-months training designed to equip you with the professional skills and certifications needed to excel as an Investment Representative (IR).</p>	<p>"Build and Grow Client Relationships: Actively source and manage a portfolio of new and existing clients, providing expert insights on securities, futures, and other financial instruments.</p> <p>Execute Trades: Leverage on Tiger Brokers' powerful trading app and platform, execute and manage orders, ensuring accuracy, speed, and adherence to risk management protocols.</p> <p>Market Analysis: Stay on top of global financial markets, providing clients with timely insights, market trends, and investment opportunities.</p> <p>Develop Customized Strategies: Create tailored trading strategies and solutions based on clients' financial goals, risk appetite, and market conditions.</p> <p>Regulatory Compliance: Maintain the highest ethical standards, ensuring compliance with MAS regulations, and company policies, and managing risks effectively."</p>	9am - 6pm

## #24 UOB (15 Aug only)

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
<b>Business Financial Manager</b>	<p>Recognised Degree in Accountancy/Business Administration/Banking &amp; Finance</p> <p>At least 1 year of credit and marketing experience covering local SME(s)</p> <p>Strong analytical and interpersonal skills</p> <p>Excellent communication skills.</p> <p>Results-oriented, dynamic and self-driven</p> <p>Competent in engaging and managing internal and external clients</p> <p>Proven ability to exceed sales target</p> <p>Resourceful and able to work with minimal supervision</p>	<p>We develop integrated products and services targeted at helping small and medium-sized enterprises across the region progress through different stages of growth. These include innovative solutions and initiatives in areas of working capital loans, operational efficiency and currency exposure.</p>	9am - 6pm
<b>Personal Wealth Executive</b>	<ul style="list-style-type: none"> <li>• A recognised university degree</li> <li>• Results-oriented, dynamic and self-driven</li> <li>• Competent in engaging and managing internal and external clients</li> <li>• Proven ability to achieve sales target</li> <li>• Resourceful and able to work with minimal supervision</li> </ul>	<p>As a Personal Wealth Executive within the Personal Banking business, you will be responsible for rendering financial advisory to UOB's mass-market customers. You are expected to achieve individual sales target while ensuring accurate and timely completion of the entire sales and compliance process.</p> <p>Provide prudent financial advisory and investment solutions to meet the financial planning needs and requirements of UOB's clients</p> <p>Develop and deepen relationships with clients who have been assigned to you</p> <p>Ensure proper advisory procedures and documentation while adhering to the Bank's internal policies, business processes and regulatory requirements (i.e. FAA and other related statutory Acts)</p>	9am - 6pm

**#25 VDL Enabling Technologies Group (Singapore) (15 Aug only)**

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
<b>Process Engineer (Parts Making &amp; Fabrication)</b>	<p>Qualification &amp; Experiences:</p> <p>Degree in Mechanical, Precision Engineering, or other relevant discipline.</p> <p>Good knowledge of manufacturing processes</p> <p>Knowledge of interpretation of engineering drawing</p> <p>Knowledge of designing tools (GD&amp;T)</p> <p>Problem Solving and Continuous Improvement</p>	<p>Purpose: Responsible for establishing process steps to produce in-house-made parts and meet customer expectations concerning quality, lead time, cost, and technological needs. Process Engineer drives improvements in process methods to enhance performance and output.</p> <p>Key Area of Responsibilities:</p> <p>Establish process steps to produce in-house-made parts and meet customer expectations in terms of quality, lead time, cost, and technological needs, without compromising health and safety.</p> <p>Create process routing (work instructions) &amp; BOM in BaaN, and prepare an Inspection Method Sheet (IMS)/checklist.</p> <p>Read and interpret 2D drawing, 3D model and customer specifications on drawing.</p> <p>Ensure process routing is ready for both the first article and volume production.</p> <p>Perform sustaining engineering work (documentation of the process, optimization of resources, support production team, resolving technical/quality issues).</p> <p>Monitor process performance (quality, cost, lead time) and yield using tools (e.g.: SPC).</p> <p>Monitor First Article (FA) progress and resolve technical issues in a timely manner to ensure smooth production flow from FA to volume production.</p> <p>Drive improvements to process methods to enhance performance and output.</p> <p>Take accountability in leading special projects and processes, treating it like a specialist in the identified process assigned by a superior.</p>	44hrs
<b>Associate, Program Management</b>	<p>Qualification &amp; Experiences:</p> <p>Degree in Engineering or other relevant qualification.</p> <p>Good problem-solving skills</p> <p>Meticulous in details</p> <p>Proficient in advanced Microsoft Excel functions</p>	<p>Purpose: To be the first point of contact for both customer and factory on technical and operational issues.</p> <p>Responsible to supporting the lead program management team to resolve issues and constraints that will impact delivery schedule.</p> <p>Key Area of Responsibilities:</p> <p>Communicate and align with customer and factory on the program delivery schedule.</p> <p>Ensure closure for quality-related issue with factory and customer.</p> <p>Review Engineering Change Order (ECO) changes and</p>	44hrs

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
	Good communication skills.	<p>update the associate BOM to the latest revision.</p> <p>Lead the program team to address order material shortages so that Production build can be on schedule.</p> <p>Arrange shipment for Open Orders to meet customer needs.</p> <p>Communicate End of Life (EOL) items to customer to finalise its replacement.</p> <p>Support and participate in company continuous improvement program.</p>	
<b>Process Engineer (System Integration)</b>	<p>Qualification &amp; Experiences:</p> <p>Diploma/Degree in Mechanical/Mechatronics/Electrical or Precision Engineering or other relevant discipline.</p> <p>Good problem-solving skills</p> <p>Proficient in Microsoft Excel functions</p> <p>Good communication skills.</p>	<p>Purpose: Strategic planning and develop cost effective &amp; low risk manufacturing/assembly process steps/planning from raw material to completion including special processes through Product Quality Plan (PQP).</p> <p>Key Area of Responsibilities:</p> <p>Transfer of Project, Technology, System from customer to VDL for New product development.</p> <p>Feasibility study for New Assembly.</p> <p>Identify the facilities/supplies required for the assembly.</p> <p>Define and establish Project Plan for Assembly to meet on time delivery</p> <p>Resolve technical issues in assembly to ensure smooth production.</p> <p>Manage technical changes to fulfill customer requirement</p> <p>Implement improvements to processes for cost effectiveness.</p> <p>Support and participate in company continuous improvement program.</p>	44hrs
<b>Manufacturing Engineer (System Integration)</b>	<p>Qualification &amp; Experiences:</p> <p>Bachelor in Engineering (Mechanical, Mechatronics, Electrical, Precision or Industrial Engineering)</p> <p>Strategic, creative, and systemic thinking</p> <p>Excellent leadership and effective communicator with all levels of associates and management.</p>	<p>Purpose: Responsible for the complete end-to-end planning, direction, and coordination of all the manufacturing processes related to system integration for a specific project. Together with the program team, the Manufacturing Engineer is to ensure that assembly can meet costs, quality, and delivery requirements.</p> <p>Key Area of Responsibilities:</p> <p>Design of production layout to enable production to fulfill build plan forecast or pre-defined production run rate.</p> <p>Define requirements for assembly tools and equipment to support product realization and build plan.</p> <p>Participate actively in PQP to ensure that risks are identified, and preventive actions defined and implemented.</p> <p>Implement a certification program for assembly to ensure that assembly module leads are trained and certified to carry out specific assembly tasks.</p> <p>Collaborate with the Process Engineer in the design of the assembly Kit Kart for issue of materials into the clean room</p>	44hrs

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
		<p>and effective handling of materials inside the production area.</p> <p>Lead in resolving technical problems faced by Assembly, and resolve internal and customer quality complaints.</p> <p>Monitor assembly capacity of the program, and perform ramp assessment when required, to fulfill build plan system delivery.</p> <p>Contribute to the system build progress meetings together with the program team to meet on-time delivery targets.</p> <p>Evaluate assembly efficiency and implement improvements to achieve the calculated standard time.</p> <p>Monitor all customer's consigned equipment to ensure all are inventoried, calibrated, and maintained regularly.</p> <p>Identify and implement improvements to shorten production cycle time, improve overall production efficiency, improve quality performance, enhance safety or to boost sustainability.</p> <p>Support and participate in company continuous improvement program.</p>	

## #26 Visionpower Semiconductor Manufacturing Company (15 Aug only)

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
<b>Process Engineer (Etch, Photo, Thin Film, Diffusion)</b>	Bachelor's or higher degree in Electrical and Electronics Engineering, Chemical Engineering, Material Science, Physics or STEM related fields	1.) You will be responsible to deliver robust and efficient semiconductor manufacturing process with data driven analytics and systemic problem-solving skills in the respective modules: Etch (Dry Etch and Wet Etch); Photolithography; Diffusion; Chemical Mechanical Planarization (CMP); Chemical Vapor Deposition (CVD) or Physical Vapor Deposition (PVD)	8.30am to 6pm
<b>Equipment Engineer (Etch, Photo, Thin Film, Diffusion)</b>	A bachelor's degree or higher in Electrical and Electronics Engineering, Chemical Engineering, Materials Science, Physics, or a related STEM field	1.) You will be responsible and focus on improving tool performance and availability, in charge if maintenance, diagnosing failures and implementing effective solutions to meet uptime and cycle time requirements in the respective modules: Etch (Dry Etch and Wet Etch); Photolithography; Diffusion; Chemical Mechanical Planarization (CMP); Chemical Vapor Deposition (CVD); or Physical Vapor Deposition.	8.30am to 6pm
<b>Process Integration Engineer</b>	Materials Science   Electrical Engineering   Chemical Engineering   Mechanical Engineering   Physics   Chemistry or a related engineer discipline	1.) Failure analysis and yield improvement of new products and mass-produced products 2.) Maintenance of daily operations and resolution of issues 3.) Monitoring and management of production process parameters, analysis of product abnormalities, and maintenance and improvement of SPC (Statistical Process Control) 4.) Strong communication skills and ability to work within cross-functional teams, including internal and external partners	8.30am to 6pm
<b>IT Operation Support Engineer</b>	Bachelor's or higher degree in Computer Science, Electrical , Mechanical, or Industrial Engineering.	You will be responsible for developing CIM system solutions, leading full-automation implementations, defining operational processes, and spearheading automation in 12" fab operations and wafer manufacturing processes.	8.30am to 6pm
<b>Intelligent Manufacturing Center Engineer</b>	Bachelor's or higher degree in Computer Science, Electrical , Mechanical, or Industrial Engineering	1.) Your role is to optimize manufacturing efficiency and productivity through innovative applications, breakthrough analysis, and strategic planning to enhance production processes and meet customer demands. 2.) Strong understanding of semiconductor technology is preferable . 3.) Knowledge of CIM, Full Automation, and Quality Management.	8.30am to 6pm
<b>Electrical Engineer</b>	Bachelor's degree in Electrical Engineering or related field	1.) Take charge of facility MEP package concept design and RFP Preparation for 300mm semi-conductor Fabrication plant. 2.) Supervise and monitor EPC contractors or design consultants' design progress. 3.) On-site management MEP package construction schedule and commissioning.	8.30am to 6pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours
		<ul style="list-style-type: none"><li>4.) Evaluate electrical products and systems by designing testing methods</li><li>5.) 300mm fab facility electrical system operating experience, especially 22~66 kV/ GIS/ Main Transformer &amp; Emergency Generator Systems.</li><li>6.) Test finished products and system capabilities</li><li>7.) Keep necessary equipment operational</li><li>8.) Contribute to team efforts by accomplishing related results</li></ul>
