PSA CORPORATION PTE LTD

PSA Singapore is one of the flagship terminals of [PSA International](#), a leading port group with a global network encompassing 179 locations in 45 countries. With a total of 56 berths and designed annual capacity of 46.5 million TEUs, we operate the world's largest container transshipment hub. In 2025, PSA Singapore handled 44.5 million twenty-foot equivalent units (TEUs) of containers. With connections to 600 ports globally, shippers have access to daily sailings to every major port in the world, operating 24/7, all year round. Beyond port operations, PSA Singapore is expanding its portfolio to offer shippers and cargo owners innovative supply chain solutions to facilitate global trade by enhancing the physical, financial and regulatory flow of cargo.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Operations Executive	- Local polytechnic diploma or GCE A levels with 2 H1 and 2 H2 credits. - Willing to perform shift duties.	Master the fundamentals of vessel operations and resource planning. Oversee port operations within and throughout PSA Terminals.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Container Handling Specialist (Prime Mover Driver)	Work on rotating shift.	Drive specialised vehicles to truck containers within and between PSA terminals efficiently.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Container Equipment Specialist (Yard Crane)	- Able to work at heights. - Work on rotating shift	- Operate 7-storey high cranes in the container yards, loading and unloading containers onto and from container trucks. - Your accuracy and efficiency are crucial to smooth operations and contribute towards the port's performance.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Dormitory Supervisor	- Minimum Secondary qualification. - Work on rotating shift.	- Assisting the Dormitory Manager in Dormitory Operations: - Ensure that dormitory premises are cleaned and meals are provided on time. - Schedule and supervise cleanup and repair assignments as and when necessary. - Provide daily update of residents. - Oversee the proper usage of the recreational facilities and facilitate the booking of these facilities. - Ensure that rooms are equipped for arrival of workers. - Collaborate with security staff to conduct checks. - Attend to residents' queries and requests etc.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Electrical Engineer (Digital Systems)	- Degree in Electrical or Electronics Engineering. - Experience in automated reefer monitoring systems and embedded systems will be an added advantage.	- Lead a team of technical staff in the development, operation and maintenance of digital systems and communications services to ensure the delivery of quality solutions and reliable support for terminal operations. - These include systems for Security, Surveillance, Gate, Wireless Voice Comms and IoT. - You will also be involved in project consultancy for A&A projects and installation of new digital systems.	5 days work 8am to 5.30 pm
Emergency Response Specialist	- Relevant operational experience in firefighting, rescue, emergency response, or equivalent uniformed services is an advantage. - Knowledge of HAZMAT response, technical rescue, or marine emergency operations is preferred. - Capable of performing physical tasks and able to meet the demanding requirements of emergency response duties. - Strong situational awareness, problem-solving skills, and ability to perform under pressure. - Willingness to work shifts, including nights, weekends, and public holidays. - Effective communication skills and the ability to coordinate with multiple stakeholders during emergencies. - Min. N Level / Nitec in any discipline. - Served as a fire fighter with SCDF during National Service.	- Respond promptly and effectively to a wide range of emergency incidents, including: - Structural and industrial fires. - Hazardous material (HAZMAT) releases. - Land equipment and marine interface rescue operations. - Medical emergencies. - Execute emergency response operations across diverse port facilities such as terminals, automated yards, vessel berths, and automobile terminals. - Support on-site operations with relevant government agencies and internal stakeholders to ensure safe and effective incident management. - Apply advanced firefighting, rescue, and mitigation techniques in high-pressure, fast-moving scenarios. - Conduct post-incident stabilisation, recovery support, and operational continuity activities. - Participate in emergency preparedness initiatives, including training, drills, audits, and equipment readiness checks. - Support capability development in emerging risk areas (e.g., electric vehicle fires, alternative fuels). - Contribute to a culture of safety, innovation, and continuous improvement within the Emergency Response team.	- Rotating Shifts 8am to 6pm 6pm - 8am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Equipment Engineer	• Engineering degree. • Passion for technology. • Willing to work outdoors & at heights.	• Troubleshoot, repair, maintain & modify automotive, hydraulic, mechanical & electrical systems used in container handling. • Troubleshoot, repair, maintain & modify automotive, hydraulic, mechanical & electrical systems used in container handling.	• 5 days work • 8am to 5.30 pm
Equipment Planning Assistant	• At least 3 'O' level credits or NITEC. • Proficient in MS applications including Excel and Word.	• Support workshop maintenance operations by coordinating equipment servicing, maintaining accurate records, and ensuring compliance with inspection and regulatory requirements.	• 5 days work • 8am to 5.30 pm
Executive Service Engineer (M&E Services)	• Diploma in Electrical or Mechanical Engineering. • At least 2 years experience in the design and / or maintenance of either electrical building services or M&E equipment. • Willing to work in Tuas	• You will work with a team of project engineers to manage and supervise M&E installation projects for new port facilities and buildings at PSA Tuas Mega Port. • You will work with design consultants and contractors to handle the development projects from design inception to completion to ensure compliance with building regulations and specifications. • After project completion, you may continue to lead the facilities maintenance team in the operation and maintenance of the M&E facilities.	• 5 days work • 8am to 5.30 pm
Health Safety & Security Duty Manager	• Degree or Diploma with at least 5 years of relevant experience. • Hold leadership roles in SCDF or SPF. • Those from SCDF Specialist track (EMT, Hazmat, Marine) or SPF/ security related positions are preferred. • Candidates with FSM certification will have an added advantage. • Able to meet fitness requirements of the job and can perform shift duties.	• Lead the Emergency Response team during emergency incidents. • Plan Health Safety & Security and fire awareness programmes, trainings and inspections. • Coordinate with government agencies on fire, security and pandemic follow-ups. • Plan and coordinate fire, rescue and station drills; and red teaming drills. • Develop maintenance schedule for operational equipment and vehicles. • Manage security service provider. • Ensure compliance of ISPS & CERT requirements. • Prepare and review contingency plans, SOPs and other related plans/ practice.	• Rotating Shifts • 8am to 6pm • 6pm - 8am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Inventory Planner	- NITEC or equivalent, preferably in logistics, supply chain or engineering. - Relevant experience in inventory control, supply/demand planning or logistics operations, preferably for engineering spare parts. - Proficient in Excel, Power BI knowledge is an advantage. - Familiar with ERP systems such as Maximo or Oracle. - Good communication and email writing skills.	- He/she will monitor inventory levels and plan for replenishment, raise Purchase Requisitions and coordinate with procurement, warehouse and engineering teams. - You will support inventory data preparation using Excel and Power BI and disposal of obsolete inventory.	5 days work 8am to 5.30 pm
Mechanical Engineer (M&E Services)	- Degree in Mechanical Engineering. - Familiar with local Code of Practices, Building and Fire Safety Regulations. - Preferably with experience in the design and/or maintenance of M&E equipment and systems used in buildings. - Willing to work in PSA Tuas Terminal.	- Lead a team of technical staff in the maintenance of M&E facilities in buildings and container terminals. - You will also oversee M&E projects from design inception to completion, ensuring compliance with building regulations and specifications and be responsible for project management and site supervision of M&E installations.	5 days work 8am to 5.30 pm
Operations Executive	- Degree in any discipline. - Strong leadership, communication and interpersonal skills. - Results oriented personality who thrives working in a dynamic environment.	- As an operations executive at control centre, you will lead a team of control centre supervisors and responsible for the planning of manpower resources and sophisticated equipment, to ensure the quick turnaround of our vessels and prompt connectivity of our customers' containers. - Execute and monitor container handling operations to ensure PSA delivers seamless service to our customers round the clock.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am
Operations Supervisor (Yard Planning)	Higher NITEC / NITEC in any discipline.	- In charge of export planning: - Involves allocating space for local exporting containers at the Terminal and shifting of the containers across various Terminals, consolidating them at the Loading Terminal where the Loading Vessel will berth at. - Plan and prearrange the lying containers at the yard to ensure smooth loading operations. - Involved in empty container management where you will pick and nominate empty containers to fulfil orders by the liners.	12 hours rotating shift 7.30am - 7.30pm 7.30pm - 7.30am

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Senior Civil Engineer (Planning & Design)	- Degree in Civil Engineering or Environmental Engineering. - Competent in AutoCAD 2D/3Dm and Revit. - Knowledge of e-BIM submission system. - Has at least 5 years of working experience with BIM related to infra works and sub-utilities like drainage / sewerage. - Knowledge of planning, Singapore Green Mark and CoreNet eSubmission System. - Structural Design Experience. - Experience in geotechnical design and interpretation of a Geotechnical Investigation Report.	- Be part of a dynamic team to formulate a master plan of Port Terminal civil projects. - Your main responsibilities include planning, designing, implementing and managing projects in port infrastructure and buildings.	5 days work 8am to 5.30 pm
Senior Electrical Engineer / Electrical Engineer (M&E Services)	- Degree in Electrical Engineering. - At least 2 years' experience in maintenance and/or design of electrical building services. - Holders of Licensed Electrical Worker (LEW) license or personnel who had completed the course in High Voltage Operation for Engineers will have an advantage.	- Lead a team of technical staff in the management and maintenance of low voltage electrical distribution system in buildings and container terminals. - Lead a team of technical staff in the management and maintenance of low voltage electrical distribution system in buildings and container terminals.	5 days work 8am to 5.30 pm
Senior Engineer / Engineer (Quality Management)	- Degree in Mechanical Engineering. - Candidates with experience/knowledge in the following areas will be considered favourably. - Steel structure design to standards such as EN or BS standards. - Finite element analysis (FEA/FEM).	- Working alongside inspectors and equipment engineers, you will facilitate inspection of the structural integrity of container handling cranes. - You will also be involved in reviewing steel structure designs for compliance with relevant codes and safety standards. - Areas of interest will include finite-element analysis of structures, failure analysis of components and crane design evaluations.	5 days work 8am to 5.30 pm
Senior Service Engineer (Construction & Project Management)	- Diploma in Civil Engineering, Construction Engineering, Facilities Management or Building Services - At least 5 years of either project management experience in the construction industry or facilities maintenance experience in commercial/industrial buildings. - Experience in construction of building projects with	- Supervise construction works, especially architectural works and M&E installation. - Monitor construction progress against planned progress. - Conduct regular site safety inspections. - Assist in QA/QC. - Ensure construction methods are in accordance with approved Method Statements.	5 days work 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	architectural finishes and M&E installation work is preferred. • Knowledge of Building Information Modelling will be an advantage. • Possesses excellent communication and interpersonal skills. • Proficient in MS Work & Excel.	• Liaise with RE/RTO on inspection of structural works. • Coordinate with various stakeholders on facilities requirement to ensure operationality, functionality and ease of maintenance.	
Service Engineer (Digital Systems)	• Diploma in Electrical, Mechanical or Mechatronics Engineering. • Experience in maintenance methodology, network and security system will be an advantage. • Comfortable with working outdoors and at height.	• Working with the engineers and leading a team of technical specialists, you will maintain our electronics and communications systems. • These include CCTV, Card Access, Trunk Radio and UPS. You will also provide technical support and consultancy services on these systems. • In addition, you will be involved in projects and tenders for procurement of related systems and equipment.	• 5 days work • 8am to 5.30 pm
Service Engineer (Equipment Engineering)	• Diploma in Electrical, Mechanical or Mechatronics Engineering. • Enjoy working outdoors and at height. • Willing to work in PSA Tuas Terminal.	• Working with the engineers, you will be involved in maintaining container handling equipment and other electrical/mechanical systems and in the planning and implementation of maintenance and repair activities. • You will also supervise and train a team of technical specialists in equipment maintenance.	• 5 days work • 8am to 5.30 pm
Service Engineer (Infrastructure Management)	• Diploma in Civil Engineering, Construction Engineering, Building or Facility Management or related fields	• Plan, prepare, monitor and update infrastructure maintenance programmes and project schedules. • Coordinate and manage contractors on maintenance/project works. • Prepare annual budget and expenditure for maintenance/project works. • Draft contract specifications for calling of quotation/tender for maintenance/project works. • Liaise with government agencies on civil and marine related issues.	• 5 days work • 8am to 5.30 pm
Service Engineer (Integrated Facilities Management)	• Diploma in Civil Engineering, Construction Engineering, Building & Facility Management.	• Plan, prepare, monitor and update building facilities operation and maintenance program and project schedules. • Prepare annual budget and expenditure for facilities management and maintenance/project works.	• 5 days work • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• Draft contract specifications for calling of quotation/tender for facilities management, maintenance/project works. • Coordinate and manage contractors on facilities management, maintenance/project works at offices and buildings. • Liaise with government agencies on building related issues.	
Technical Specialist (Electrical Network)	• NITEC in Electrical Engineering, NITEC in Electrical Technology (Power & Control) or Integrated Mechanical & Electrical Design. • Willing to work outdoors and at heights.	• Assisting the LEW and engineers in performing preventive and corrective maintenance of electrical systems supervising new electrical installations and SCADA system testing/commissioning troubleshooting network fault and performing power supply restoration work.	• 5 days work • 8am to 5.30 pm
Technical Specialist (Equipment Engineering)	• NITEC / Higher NITEC in an engineering discipline. • Willing to work outdoors at heights and on weekends.	• Troubleshoot, repair and maintain and modify automotive, hydraulic, mechanical and electrical systems used in container terminal operations. • Participate in equipment modification projects to improve equipment reliability.	• 5.5 days work • 8am - 5pm
Trainee Lashing Supervisor	• Willing to work on rotating shifts and weekends. • Able to work at heights.	• You will secure containers on vessels using lashing equipment, berth and unberth vessels, carry out wharf operations such as coning and deconning, and assist in water bunkering operations. • Upon completion of the 1-year traineeship programme, you will supervise lashing operations and motivate a team of lashing specialists.	• 12 hours rotating shift • 7.30am - 7.30pm • 7.30pm - 7.30am
Warehouse Assistant	• Able to multi-task and communicate with others.	• Support the day-to-day operations within warehouse and support day to day unpacking, picking, re-packing and re-labelling operations. • Will also support day to day delivery of parts from warehouse to plant.	• 12 hours rotating shift • 7.30am - 7.30pm • 7.30pm - 7.30am
Workplace Safety & Health Officer	• Degree in Engineering, Environmental, Health and Safety. • Keen interest or knowledge in data analytics. • Experience in occupational safety, health and environmental field, OSH/ ISO documentation,	• Drive workplace safety & health initiatives. • Conduct workplace safety & health audit and training. • Keeping abreast of best workplace safety and health standards and promoting good practices at work.	• 5 days work • 8am to 5.30 pm

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	and knowledge of related government regulations. • Candidates who are MOM Registered WSH Officer or with experience / certification in Industrial Hygiene will have added advantage.	• Perform the statutory roles of a Registered Workplace Safety & Health Officer (RSO). • Ensure corporate compliance with Workplace Safety & Health regulations and statutory requirement.	

PSA MARINE PTE LTD

PSA Marine is a leading maritime services provider with a heritage dating back to 1964. From the early days as the Port of Singapore Authority to corporatisation as PSA Marine, the company has played a vital role in Singapore's growth as the world's busiest container transshipment hub. With over 2,000 dedicated employees and modern fleet of more than 80 tugs, PSA Marine's services are rendered in Americas, Europe, Bangladesh, China, Taiwan, South Korea, and Southeast Asia today, supporting port operations, vessel navigation, and safe maritime trade.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Operations Executive (Mission Command Centre)	• Possess at least a Diploma or equivalent. • Have good communication and interpersonal skills. • Be able to remain calm and make logical decisions under stress and emergency circumstances. • Be willing to perform overnight shift work.	• Take leadership in the planning and deployment of pilotage, harbour towage and water boat resource to support 24/7 operations of the busiest port in the world. • Uphold the efficiency of company's services which is part of Singapore maritime ecosystem. • Directly communicate with vessels to coordinate arrival and service timings. • Attend to all customer queries and request new orders, amendments and cancellations. • Perform any other duties as assigned.	• Shift Work • 7.30am to 7.30pm • 8/9 hr flexi shifts • 126800
Deputy Operations Executive (Engineering Inventory Management)	• Possess at least Nitec/Higher Nitec qualifications. • Be willing to perform shift work.	• Carry out daily inventory store activities. • Receive, inspect, and verify incoming materials, goods, and supplies against delivery documentation. • Issue materials and products in accordance with authorized requests and record all stock movements. • Work with inventory store manager-in-charge to review process workflow and implement process improvements to increase efficiency and effectiveness. • Ensure safe, proper and effective housekeeping of inventory store. • Issue items, update inventory and monitor stock levels. • Manage disposal of waste and carry out regular inspections of inventory store items and storage conditions.	• 5.5 days work week, alt Sat • Mon to Fri: 7.30am to 4.30pm, Alt Sat: 7.30am to 11.30am • 126800

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• Label, store and file stock items and ensure all required documentation are completed. • Conduct regular stock takes, support reconciliation and compile necessary reports. • Allocate storage space and ensure safe equipment handling at all times. • Participate in innovation and work improvement projects. • Perform any other duties as assigned.	
Driver	• Possess valid Class 3 / Class 3A driving licence. • Possess good driving record with relevant experience. • Be willing to perform shift work.	• Responsible for ferrying harbour pilots or other approved persons as assigned by the Mission Command Centre, safely and on time. • Familiar with berth locations in the port terminals and routes to and from these places. • Ensure the proper running, use, care and cleanliness of the assigned vehicle.	• Shift Work • Morning: 0700 to 1500 • Afternoon: 1500 to 2200 • Night: 2200 to 0700 • 126800
Fleet Engineering Specialist (Electrical/Mechanical)	• Possess at least a Nitec in Marine Technology, Electrical Engineering or Mechanical Engineering.	• The Fleet Engineering Specialist is responsible for carrying out repair, maintenance, and troubleshooting of machinery onboard PSA Marine harbour crafts to ensure operational reliability. • They are also involved in the leasing with the Fleet Operations team on breakdown reports and harbour crafts status. • Troubleshoot and carry out thorough rectification of deficiencies in machinery and control system. • Perform wiring and connection of electrical cables. • Install electrical and electronic accessories and components. • Perform any other duties as assigned. • Perform lathe machining, basic gas welding, and cutting works to facilitate repair to machinery. • Assist in lifting activities, forklift operation, confined space assessment. • Perform proper disposal of used oils and chemicals. • Perform any other duties as assigned.	• Working hrs: 3 kinds, rotated • Normal – 7.30am to 4.30pm, Sat - 7.30am-11.30pm (5.5 day) • Day – 7.30am to 3.30pm, 6 days • Night – 2.30pm to 10.30pm, 6 days • 126800
Launch Master	• Possess at least GCE N/O Levels, Nitec/Higher Nitec qualifications. • Possess a valid Port Limit Steersman (PLSM) licence issued by Maritime and Port Authority of Singapore.	• The Launch Master takes command of the harbour launch which provides seaward transportation and supports the safe transfer of passengers when the launch is out at sea. • He manoeuvres the launch, assisted by the Marine Assistant, and is overall	• 12 hours shift • 7.30 to 7.30 • 126800

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	Willing to perform shift work.	responsible for the safe navigation and movement of the launch.	
Marine Assistant	- Possess at least GCE 'N'/'O' Level, Nitec/Higher Nitec Qualifications. - Willing to perform shift work	The Marine Assistant supports the Launch Master by supporting the safe and efficient operation of the craft by performing lookout duties, handling mooring ropes during berthing and unberthing, maintaining cleanliness of the deck, engine room, and wheelhouse, and assisting passengers with safe embarkation and disembarkation.	12 hours shift 7.30 to 7.30 126800

SINGAPORE ONE RAIL PTE LTD

Singapore One Rail (abbreviation: SOR) is a public transport operator in Singapore, formed in joint venture between Singapore public transport operator SBS Transit and RATP Dev Asia.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Engineer, Asset Performance & Management - JRL	- Preferably 1 years of experience in Railway industry. - Experience in implementing or supporting an ERP software would be an advantage. - Strong communication and interpersonal skills.	- The role supports compliance with Authority regulations and ensures smooth operations of the Maintenance Management System (MMS). - Key duties include overseeing MMS maintenance, coordinating data extraction and reporting, and supporting analytics work with internal teams and vendors. - The position assists in managing system reliability and availability submissions, aligning asset information, and maintaining failure management and emergency response procedures. - It also involves providing frontline user support, implementing engineering and performance processes, and collaborating with the SBST Rail MMS team to meet stakeholder needs. - The role includes secretariat duties for internal or external meetings.	- Rotating Shift 699859
Assistant Engineer, Engineering Management - JRL	- Minimum 2 years of Railway experiences is preferred. - Knowledge of computer hardware or/and software applications. - Strong problem-solving skills. - Passion for data analytics and condition monitoring systems.	- The role supports the Chief Controller in monitoring and managing mainline and depot fault occurrences, as well as engineering activities. - It involves dispatching O&M staff to attend to operational or safety-related faults and providing coverage for the Maintenance Engineering Centre when required.	- Rotating Shift 699859

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	• Able to work with own initiative and independent. • Strong planning, organisation, interpersonal and communication skills. • Resourceful, self-motivated and results oriented. • Must not have colour blindness.	• The position develops procedures for normal operations, incident management, and post-investigation work, alongside preparing routine reliability and performance reports for OCC. • The role responds to incidents when activated by Engineering or Rail Engineering & Performance leaders, performs 24/7 shift duties, and handles any other tasks assigned by supervisors.	
Assistant Engineer, Power - JRL	• Preferably with relevant working experience in maintenance of HV, LV and DC traction power equipment. • Electrical Power System background. • Fresh graduates are welcome to apply. • Ability to perform 3 rotating shifts.	• The role is responsible for monitoring and controlling power systems in the Operations Control Centre, including HV, DC traction, LV equipment, and station ECS systems such as air-conditioning and mechanical ventilation. • The position coordinates closely with Traffic and frontline maintenance teams to ensure rapid fault response and efficient repair work. • Responsibilities include implementing safety plans, developing and updating work instructions and procedures, and managing electrical Permit-to-Work processes. • The role also conducts system training to maintain staff competency and supports engineering tasks or assignments as directed by supervisors.	• Rotating Shift • 699859
Assistant Engineer, Permanent Way - JRL	• Min 1 year's railway or related working experience. • Self-motivated and resourceful. • Responsible and dependable. • Able to perform night shift work.	• The role leads and supervises rail maintenance activities to ensure the permanent way and 3rd rail systems meet operational standards. • Key duties include overseeing rail replacement operations, maintenance of buffer stops and insulated rail joints, and cleaning of tracks and tunnels. • The position monitors rail-related tests and repairs, conducts inspections and data analysis, and leads emergency response for track and 3rd rail incidents. • Responsibilities also include shunting and driving engineering trains, supporting failure management and emergency procedures, ensuring ISO 14000 compliance, managing logistics and spare parts procurement, coordinating track access requests, and performing other duties assigned by supervisors.	• Rotating Shift • 699859

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Engineer, Signalling - JRL	• Experience in the field of Railway Signalling, as well as knowledge of networking and configuring or troubleshooting operating systems, will be a plus. • Good interpersonal, management and communication skills. • Railway experience will be a plus.	• The role involves planning, organizing, and leading scheduled and corrective maintenance activities for signalling and platform screen door systems, ensuring work is carried out safely, efficiently, and in accordance with maintenance schedules and standards. • It includes overseeing fault diagnosis and rectification, coordinating prompt responses to system failures, reviewing and approving maintenance documentation, and managing maintenance logistics. • The position also requires conducting safety inspections, audits, and housekeeping checks, maintaining up-to-date technical documentation, delivering in-house training to build team competency, and enforcing cybersecurity practices. Strong leadership and mentorship are essential to promote compliance, safety, and accountability, with additional responsibilities such as driving company vehicles and undertaking other duties as required.	• Rotating Shift • 699859
Engineer, Engineering Management - JRL	• Preferably 3-5 years of Railway experiences. • Knowledge of computer hardware or/and software applications. • Strong problem-solving skills. • Passion for Data for analytics and CdM. • Keen interest in research and experimentation. • Ability to identify colours. • Ability to perform rotating shifts.	• The role supports the Maintenance Engineering Centre (MEC) in operating and maintaining Condition Monitoring (CdM) systems. • Key responsibilities include monitoring, analysing, and reporting engineering data and alerts, and providing guidance to OCC during incidents. • The role develops operational and incident-related procedures, prepares routine reliability and performance reports, and supports post-investigation work for complex failures. • It collaborates with Data Analysts, System Engineers, Operations, and Engineering teams to enhance MEC's data analytics and digital capabilities. • The position also performs secretariat duties for review boards and meetings, assists in special MEC-related events, responds to incidents when activated, and undertakes tasks assigned by supervisors.	• Rotating Shift • 699859
Engineer, Rolling Stock - JRL	• Preferably at least 3 years of post-graduate working experience with 2 years of	• The role leads teams of Assistant Engineers and Technicians to perform preventive and corrective maintenance	• Rotating Shift • 699859

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
	relevant working experience in a railway environment. • Good knowledge in electrical, electronic, air-conditioning, mechanical and pneumatic systems of electric trains. • Good interpersonal, management and communication skills. • Fresh graduates may apply.	on electric trains, engineering vehicles, components, and equipment to meet daily production requirements. • Key duties include planning and coordinating maintenance activities, ensuring compliance with work instructions, safety procedures, and quality standards, and overseeing staff qualifications, authorization, and training. • The position is responsible for team safety, discipline, welfare, equipment upkeep, resource planning, and prudent expenditure. • It handles workplace housekeeping, staff engagement, and adherence to HR and operational guidelines. • The role also develops and manages the section budget, supports duty rosters, conducts investigations for train-related safety incidents, and performs additional tasks assigned by supervisors.	
Operations Associate - JRL	• Minimum 5 credits GCE 'O' Levels. • Able to reach the height of 207cm with both hands. • Able to identify colours. • Willing to perform shift work, including weekends and Public Holidays. • Preferably with minimum 2 years' working experience in the service or retail industry. • Required to manually operate station and train borne equipment. • Good interpersonal skills with a passion to work with people.	• The role supports safe, efficient station and train operations by assisting the Operations Specialist in daily operational control, incident handling, and the delivery of quality customer service. • Responsibilities include managing passenger flow and crowd control, enforcing RTS regulations, protecting revenue, resolving ticketing issues, and manning the Passenger Service Centre. • The position involves conducting security patrols, coordinating with Transit Guards, setting routes manually when required, and supporting training for trainees. • On board trains, duties include providing passenger assistance and travel information, assisting passengers with special needs, monitoring train performance, responding to equipment failures and incidents, communicating with the OCC, and managing train defects and emergencies in accordance with established procedures. • The role also requires operating passenger trains and performing Emergency Train Operator duties, while maintaining required certifications and carrying out other tasks as directed.	• Rotating Shift • 699859

SMRT CORPORATION PTE LTD

SMRT Corporation Ltd (SMRT) is a leading public transport services provider in Singapore. As the nation's dominant rail operator, SMRT manages and operates the North-South Line, East-West Line, Circle Line, Thomson-East Coast Line, and Bukit Panjang Light Rail Transit. These services are complemented by its bus, taxi, and private hire vehicle operations.

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
Assistant Engineer, EMF	• Diploma in Electrical / Electronic Engineering. • Experienced and familiar with Fire Protection System will be an advantage. • Possess strong mechanical and electrical fundamentals. • Able to communicate effectively and good team player. • Meticulous in ensuring that maintenance work and activities are performed in a safe and orderly fashion by the team. • Possesses an analytical mindset and is able to exhibit leadership skills in the team.	• To supervise the team in performing preventive and corrective maintenance work on Electrical, Mechanical and Fire Protection System. • Duties also include proposing workflow improvements to improve the reliability of the Electrical, Mechanical and Fire Protection System. • Manage his team's performance in achieving established Key Performance Indicators (KPIs) as well as facilitating the work of external contractors. • Plan, prioritise and optimise material resources and manpower for scheduled maintenance work and fault. • Mentor and impart knowledge and skills to junior staff. • To perform preventive maintenance work of Electrical, Mechanical and Fire Protection System. • To perform corrective maintenance work of Electrical, Mechanical and Fire Protection System. • To assist in conducting fault analysis and troubleshooting of Electrical, Mechanical and Fire Protection System. • To supervise the execution of Electrical, Mechanical and Fire Protection System preventive maintenance work. • To supervise the execution of Electrical, Mechanical and Fire Protection System corrective maintenance work. • To perform complex fault analysis and testing of Electrical, Mechanical and Fire Protection System. • To supervise the work of contractors and stakeholders external to the Electrical, Mechanical and Fire Protection System to ensure safety requirements and operating standards are met. • To ensure proper housekeeping of spare parts, equipment and tools. • To document inspection and maintenance activities.	• Shift Work • 437161

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• To comply with Workplace Safety and Health (WSH) policies, procedures and regulations when carrying out work. • To comply with Rapid Transits System (RTS) Codes of Practices. • To track quantities of and support the requisition of maintenance supplies and expendables required at work base. • To propose workflow improvements to enhance the reliability and efficiency of Electrical, Mechanical and Fire Protection System. • To carry out engineering improvement activities to enhance the reliability and efficiency of Electrical, Mechanical and Fire Protection System. • To perform on-the-job coaching. • To manage the team's performance in achieving Key Performance Indicators (KPIS).	
Assistant Engineer, Field Services (NSEWL)	• Diploma in Electrical Engineering, Electronics Engineering, or equivalent. • Preferably 5 years' experience as team leader in a fast-paced maintenance environment.	• The Assistant Engineer (Signal Field Service) supervises his team in performing preventive and corrective maintenance work on various railway signalling systems and platform screen doors. • He a/so contributes to workflow improvements to enhance the reliability signalling system, as well as supervising and ensuring the work quality and safety of external contractors and stakeholders. • He may be required to perform shift duties at various rail premises such as depots, train stations, viaduct, and tunnels. • He demonstrates team leadership skills in ensuring the team carries out the maintenance work in a safe and orderly manner, as well as manages the team's performance in achieving established Key Performance Indicators. • To lead team of Technical Officers in performing tasks in compliance with relevant procedures and instructions contained in Quality Procedures, Work Specifications, Work Instructions, and Signal Standing Instructions. • To assist in supervising and coaching of new staff and conducting on the job training.	• Shift Work • 437161

Job Positions	Pre-requisites	Key Responsibilities	Working Hours / Location
		• To provide 1st line fault response and recovery. • To perform timely trackside CM activities including fault troubleshooting, rectification and testing. • To plan and carried out trackside PM work according to schedule. • To perform trackside equipment overhaul activities and to ensure that the programs adhere to the schedule. • To carry out day-to-day monitoring of equipment performance and follow up. • To carry out day-to-day fault analysis and follow up. • To perform tasks in compliance with relevant procedures and instructions contained in Quality Procedures, Work Specifications, Work Instructions, Signal Standing Instructions and any relevant change instructions disseminated. • To operate safely and efficiently all Signal Measuring, Test Equipment, Instruments and Tools 11. To comply with and exercise safety at all times in accordance with all Safety Procedures. • To be responsible for the safety of self, peers at workplace; off and on trackside throughout working period. • To carry-out the role of PIC and PM duties and responsibilities. • To complete the necessary reports for the task at hand. • To assist EMM in managing and controlling of maintenance spares. • To ensure good housekeeping at the workplace.
